L'art Psychopathologique:

L'art psychopathologique Robert Volmat, 1956 , *Learning from Madness* Kaira M. Cabañas, 2018-09-14

Throughout the history of European modernism philosophers and artists have been fascinated by madness. Something different happened in Brazil however with the art of the insane that flourished within the modernist movements there. From the 1920s to the 1960s the direction and creation of art by the mentally ill was actively encouraged by prominent figures in both medicine and art criticism which led to a much wider appreciation among the curators of major institutions of modern art in Brazil where pieces are included in important exhibitions and collections. Kaira M. Cabañas shows that at the center of this advocacy stood such significant proponents as psychiatrists Osório César and Nise da Silveira who championed treatments that included painting and drawing studios and the art critic Mário Pedrosa who penned Gestaltist theses on aesthetic response. Cabañas examines the lasting influence of this unique era of Brazilian modernism and how the afterlife of this outsider art continues to raise important questions. How do we respect the experiences of the mad as their work is viewed through the lens of global art? Why is this art reappearing now that definitions of global contemporary art are being contested? *Learning from Madness* offers an invigorating series of case studies that track the parallels between psychiatric patients' work in Western Europe and its reception by influential artists there to an analogous but altogether distinct situation in Brazil.

Art Against Stigma Hans-Otto Thomashoff, Norman Sartorius, 2004 This exemplary book on the fight against the stigma of psychiatric illness reveals in two ways how art is involved. More than 20 psychiatrists art historians art therapists as well as artists describe the historic path of destigmatization which is accompanied by a representative selection of about 100 pictures crossing all borders. Yet the position of the various authors in itself reflects the evolution from the anonymous case to the artist whose mental illness is a part of his privacy thus separated from the value of the artwork.
