Last Mission:

The Last Mission Jim Smith, Malcolm McConnell, 2007-12-18 A gripping account of the final American bombing mission of World War II and how it prevented a military coup that would have kept Japan in the war How close did the Japanese come to not surrendering to Allied forces on August 15 1945 The Last Mission explores this question through two previously neglected strands of late World War II history whose very interconnections could have caused a harrowing shift in the course of the postwar world On the final night of the war as Emperor Hirohito recorded a message of surrender for the Japanese people a band of Japanese rebels commanded by War Minister Anami's elite staff burst into the palace They had plotted a massive coup that aimed to destroy the recordings of the Imperial Rescript of surrender and issue false orders forged with the Emperor's seal commanding the widely dispersed Japanese military to continue the war If this rebellion had succeeded the military would have proceeded with large scale kamikaze attacks on Allied forces costing huge casualties and just possibly provoking the Americans to drop a third atomic bomb on Japan over Tokyo and continue to drop more bombs as Japanese resistance stiffened Meanwhile in the midst of an end of war celebration on Guam Air Force radio operator Jim Smith and his fellow crewmen received urgent orders for a bombing mission over Japan's sole remaining oil refinery north of Tokyo As a stream of American B 29B bombers approached Tokyo Japanese air defenses fearing the approaching planes signaled the threat of a third atomic bomb ordered a total blackout in Tokyo and the Imperial Palace completely disrupting the rebels plans Smith and his fellow crewmembers completed the mission and a few hours later the Emperor announced the surrender over Japan's airwaves dictating the end of the war The Last Mission is an insightful piece of speculative investigation that combines narrative storytelling with historical contingency and explores how two seemingly unrelated events could have profoundly changed the course of modern history [The Last Mission](#) Malcolm McConnell, 2024-04-29 How close did the Japanese come to not surrendering to Allied forces on August 15 1945 The Last Mission explores this question through two previously neglected strands of late World War II history whose very interconnections could have caused a harrowing shift in the course of the postwar world On the final night of the war as Emperor Hirohito recorded a message of surrender for the Japanese people a band of Japanese rebels commanded by War Minister Anami's elite staff burst into the palace They had plotted a massive coup that aimed to destroy the recordings of the Imperial Rescript of surrender and issue false orders forged with the Emperor's seal commanding the widely dispersed Japanese military to continue the war If this rebellion had succeeded the military would have proceeded with large scale kamikaze attacks on Allied forces costing huge casualties and just possibly provoking the Americans to drop a third atomic bomb on Japan over Tokyo and continue to drop more bombs as Japanese resistance stiffened **The Final Mission** Lisa Westwood, Beth O'Leary, Milford W. Donaldson, 2016-01-09 The world will always remember Neil Armstrong and Buzz Aldrin for their first steps on the moon yet few today hold in respect the sites that made these and other astronauts journeys possible Across the

American landscape and on the lunar surface many facilities and landing sites linked to the Apollo program remain unprotected. Some have already crumbled to ruins, silent and abandoned. The Final Mission explores these key locations, reframes the footprints and items left on the moon as cultural resources, and calls for the urgent preservation of this space heritage. Beginning with the initiation of the space race, the authors trace the history of research, training, and manufacturing centers that contributed to lunar exploration. From the early rocket test stands of Robert H. Goddard to astronaut instruction at Meteor Crater to human and primate experiments at Holloman Air Force Base, innumerable places proved critical to developing the equipment for exploring space, surviving the journey, and returning to Earth safely. Despite their significance to the history of human spaceflight, many landmarks face the threat of damage or destruction. Most alarming is that the rapid advancement of technology renders stations obsolete long before they are deemed worthy of preservation. Moreover, the lack of precedence for protecting off-planet artifacts poses a unique challenge for space archaeology. While NASA's 2011 recommendations for spacefarers suggest avoiding close proximity to this cultural landscape, the authors advocate stronger routes of preservation and present models for safeguarding space history both on Earth's surface and beyond.

Germany's Last Mission to Japan Joseph M. Scalia, 2009-03-01. When U 234 slipped out of a Norwegian harbor in March 1945, destined for Japan, it was loaded with some of the most technically advanced weaponry and electronic detection devices of the era, along with a select group of officials. En route, word came that Germany had surrendered, and the boat's commander suddenly found himself with a rogue submarine, a precious assortment of cargo, and two Japanese naval officers still at war. This dramatic account of the voyage offers an intriguing look at the individuals involved. One of these individuals was Luftwaffe General Ulrich Kessler, who was a member of Von Stauffenberg's Valkyrie conspiracy to assassinate Hitler. Kessler was aboard U 234 to escape the wrath of Hitler because he had been tabbed by Von Stauffenberg to replace Hermann Goering as the commander of the Luftwaffe. Scalia draws on U.S. Navy interrogation records, European and Japanese archives, and interviews with former U 234 crew members and other principals to develop a full portrait of the group. He also evaluates the technology of the armament on board, which included 560 kg of uranium oxide, whose presence continues to provoke questions about a Nazi plan to build an atom bomb in Japan.

Somalia International Monetary Fund. Monetary and Capital Markets Department, 2019-01-25. The CBS has taken steps to establish important pillars of a proper policy framework for financial reporting, auditing, and internal controls by approving the Internal Audit and Audit Committee Charters and is committed to address the remaining shortcomings in these areas. The Internal Audit Department (IAD) has made progress by initiating risk assessments of the various CBS business units and recruiting an Information Technology (IT) professional to join the team. The Accounting and Finance Department (AFD) is making progress in implementing accrual accounting and accounting for foreign exchange operations. International Accounting Standard (IAS) 21 has been created, and a new role of Reconciliation Officer has been established to ensure all cash transactions are recorded properly. However, the IAD functions without a director.

which places the internal audit staff at a severe disadvantage to other departments and limits their authority to effectively implement their program Also while the mission team has stressed the importance of adopting International Financial Reporting Standards IFRS during this mission and the previous mission the CBS has not formally indicated that it will adopt this framework 2 High priority recommendations were made to address these shortcomings See Table 1 for homework assignments and high priority tasks 3

In the 1820s Texas was a wilderness Settlers thought it was uninhabited although rich with wild game But many Native American tribes lived in Texas and were at war with the Spanish in Mexico Mexico ignored Texas and did not try to inhabit this wilderness Finally in the late 1820s and early 1830s Stephen F Austin was allowed to bring in three hundred Anglo settlers and Texas began to be civilized But to start there was only one town no roads no bridges no planted fields Texas was starting from ground zero but started fast They tamed the wilderness and fought the Indians They got their independence from Mexico and became a Republic soon a U S state They established a stable government similar to the one in the US and developed the infrastructure for business and international commerce In less than eighty years Texas had tamed the wild frontier and became a modern state in the United States C Herndon Williams has found forty two stories that chart this progress
