**Kings of Disaster** Simon Simonse,2023-11-27 This study of the rainmakers of the Nilotic Sudan means a breakthrough in anthropological thinking on African political systems. Taking his inspiration from René Girard's theory of consensual scapegoating, the author shows that the long-standing distinction of states and stateless societies as two fundamentally different political types does not hold. Centralized and segmentary systems only differ in the relative emphasis put on the victimary role of the king as compared with that of enemy victims. *Kings of Disaster* so proposes an uninvolved solution to the vexed problem of regicide. Recent cases occurring during the great drought of the mid 1980s are described and analyzed. Making simultaneous use of first-hand field data and archival sources, the book offers the first presentation of five Nilotic communities on the East Bank of the Nile. This study offers a new perspective on the role of violence in the structuring of society.
