*Enhancing Human Performance* Craig Speelman, 2014-03-17 The chapters in this book have their origins in papers presented at one of two conferences organised by the Global Science and Technology Forum GSTF the Annual International Conference on Human Resource Management and Professional Development HRM and PD 2012 and the Annual Conference on Cognitive and Behavioural Psychology CBP 2013 both held in Singapore On the basis of these presentations authors were invited to re work their papers to fit within the theme of enhancing human performance This theme was deliberately broad so as to include a wide range of research areas and yet was sufficiently specific that the chapters would cohere as different perspectives on the factors that affect human performance This collection of chapters reflects the disparate contexts in which human performance is examined and the many factors that impinge on performance in a negative way and the conditions under which performance can be improved The book explores topics such as the effects of a computer maths game on the acquisition of arithmetic skills in school children the effects of exercise on cognition in children with autism spectrum disorder the influence of bilingualism on visuospatial memory the potential beneficial effects
