diverse and many schools of ecology have developed classifications of communities in partial independence of one another  
There is consequently a vast and widely dispersed literature on the classification of plant and animal communities comprising  
divergent approaches of different schools and representing a great experiment on the usefulness of different possibilities for  
classification The editor sought in a review monograph of 1962 to summarize these schools and their history and in 1973  
published a treatise on Ordination and Classification of Communities as volume 5 of the Handbook of Vegetation Science We  
were fortunate in preparing the latter work to have a truly international panel of authors to discuss different major ap  
proaches to classification This second edition of the book of 1973 is intended to make the work more widely available in a  
less expensive form as companion volumes on ordination and on classification of plant communities      **General Housing**

Interest in Financial Services Marketing has grown hugely over the last few decades particularly since the financial crisis  
which scarred the industry and its relationship with customers It reflects the importance of the financial services industry to  
the economies of every nation and the realisation that the consumption and marketing of financial services differs from that  
of tangible goods and indeed many other intangible services This book is therefore a timely and much needed comprehensive  
compendium that reflects the development and maturation of the research domain and pulls together in a single volume the  
current state of thinking and debate The events associated with the financial crisis have highlighted that there is a need for  
banks and other financial institutions to understand how to rebuild trust and confidence improve relationships and derive
