The Trail of the Old Ones Raymond Drake Forehand,2012-06-29 In the Ice Age mountains of ice grew where the ice did not melt as more ice formed from the rains Cave men had to compete with all animals for shelter and food He depended on the ability of other creatures to survive This made him one of the deadliest of animals He showed no mercy He killed to borrow what he could not produce Animals produce fur to keep them warm Man had to take the furs from animals to survive He also had to take their meat bones and innards In Spring wild green things sprouted and grew Man learned to sort and use these Some leery more careful people began to notice medical properties of these plants They remembered these properties Soon others of the clan became dependent on these people who could remember what to use for this or that ailment They became the Shaman Their job became as important as the hunter Salt became an important commodity in the later Ice Age

Man crave it If you had salt you could trade it for meat furs and weapons But if they had nothing to trade then they would revert to borrowing
