English Aspectual Verbs Frederick J. Newmeyer, 1975 The Semantics of English Aspectual Complementation A.F. Freed, 2012-12-06 Complementation has received a great deal of attention in the past fifteen to twenty years various approaches have been used to study it and different groups of complement taking verbs have been examined The approach taken here employs analytic techniques which have not been systematically applied before to this group of temporal aspectual verbs In other works which have concentrated on these same verbs perlmutter 1968 1970 and Newmeyer 1969a 1969b few insights about the semantic properties of the verbs are formalized In the present study the various verbs and their complement structures as they appear in surface forms are considered for their associated presuppositions and consequences entailments The notions of presup position and consequence are defined and used so as to take conversational interaction into consideration This adds considerably to the information that can be obtained about the verbs in question Furthermore the analysis of these temporal aspectual verbs leads to a description of their complement structures in terms of events a semantic category found to appropriately characterize the quality of most of these structures In this analysis events are described as consisting of several different temporal segments thus the sentences contained in the complements of these verbs are described as naming events each containing one or more of several possible temporal segments The aspectualizers in turn act as referentials each referring to one or another of the event segments named in their complements

Proceedings of the 9th West Coast Conference on Formal Linguistics Stanford Linguistics Association, 1991 Most of the papers presented at the 1990 West Coast Conference on Formal Linguistics are included in this volume This annual publication not readily available in the past makes the latest research in formal linguistics available to a wider audience Aaron Halpern is a graduate student in linguistics at Stanford University *Verbs* William Croft, 2012-03-15 Examining the syntax and semantics of verbs from a crosslinguistic perspective this book encompasses the full range of English verb classes has a strong typological dimension and presents a model of event structure that breaks new ground in predicting and explaining linguistic facts Interfaces with English Aspect Debra Ziegeler, 2006-11-22 The field of verbal aspect has been a focus for the derivation of a multiplicity of theoretical approaches ranging over decades of linguistic research From the point of view of recent studies though there has been relatively little emphasis on the nature of the interaction of aspect with other categories and the ways in which our knowledge of aspect acts as a primary semantic contributor to the creation of other basic verbal parameters such as tense and modality This book aims to cross some of the categorial borders using a collection of studies on the interfaces of English aspect with other grammatical domains The studies in the book have been assembled in order to answer two central issues surrounding the nature of English aspect the possibility of the historical co existence of a perfective and imperfective grammatical distinction in English and the derivation of modality as an inference arising out of

specific conflicts and combinations of lexical and grammatical aspect In answering these questions a data driven rather than a theory driven approach is favoured and the general principles of Gricean pragmatics and grammaticalisation are applied to a wide range of empirical sources to propose alternative explanations to some long established problems of English historical linguistics and semantics Aspects of Aspectual Verbs in English and Russian Martin David Mellor, Robin Cooper, 1995 This thesis develops a theory of a spectral interpretation based on a representation of eventuality reference which is implicit in any sentence uttered in natural language Language users categorise real world events into various types termed aspectual class and these event types can be identified by diagnostic tests which rely on inferences between sentences and co occurrence with certain temporal adverbials and other aspectual forms **Cross-Linguistic Perspectives on Verb Constructions** Signe Oksefjell Ebeling, Hilde Hasselgård, 2015-09-10 This volume sheds new light on verb constructions by exposing them to cross linguistic analysis based on multilingual corpora It is composed of nine studies which provide insights into various aspects of cross linguistic diversity including showing that seemingly equivalent verb constructions may differ in their semantics and that similar meanings may be expressed by different types of constructions In other words this book shows that different languages have different ways of lexicalising verb based meanings most notably by means of other divergent verb constructions A range of lexicogrammatical aspects of verb constructions are explored throughout the book including time reference modality voice light verb constructions non finite complementation of lexical verbs posture verb constructions semiperiphrastic constructions and the construction and semantic composition of verbs of putting All of the contributions consider English in comparison with at least one of the following languages Czech German Lithuanian Norwegian Spanish and Swedish As such this volume offers a truly multilingual perspective on verb constructions The diversity of comparisons also highlights the multi faceted nature of the verb phrase which seems to have virtually limitless potential for exploration in the fields of tense aspect modality lexical semantics syntax and phraseology *New Approaches to Slavic Verbs of Motion* Victoria Hasko, Renee Perelmutter, 2010-05-06 This volume unifies a wide breadth of interdisciplinary studies examining the expression of motion in Slavic languages The contributors to the volume have joined in the discussion of Slavic motion talk from diachronic typological comparative cognitive and acquisitional perspectives with a particular focus on verbs of motion the nuclei of the lexicalization patterns for encoding motion Motion verbs are notorious among Slavic linguists for their baffling idiosyncratic behavior in their lexical semantic syntactical and aspectual characteristics The collaborative effort of this volume is aimed both at highlighting and accounting for the unique properties of Slavic verbs of motion and at situating Slavic languages within the larger framework of typological research investigating cross linguistic encoding of the motion domain Due to the multiplicity of approaches to the linguistic analysis the collection offers it will suitably complement courses and programs of study focusing on Slavic linguistics as well as typology diachronic and comparative linguistics semantics and second language acquisition *Three Streams of Generative Language*

Acquisition Research Tania Ionin, Matthew Rispoli, 2019-04-15 This edited volume contains a representative sample of papers presented at the 7th meeting of the Generative Approaches to Language Acquisition North America GALANA 7 conference. The book features three streams of research: Variation in Input, First Language Acquisition, and Second Language Acquisition, each of which investigates the nature of language acquisition from the generative perspective. A unique feature of the GALANA 7 conference and of this volume is the bringing together of research on generative language acquisition and research on the role that cross dialectal input variation plays in acquisition. This volume should be of interest to scholars and students of first language acquisition, second language acquisition, and input variation. A Bibliovect Guide to the Literature in English and Theoretical Syntax Lawrence R. Smith, 1981 The Expression of Tense, Aspect, Modality and Evidentiality in Albert Camus's L'Étranger and Its Translations / L'Étranger de Camus et ses traductions : questions de temps, d'aspect, de modalité et d'évidentialité (TAME) Eric Corre, Danh Thành Do-Hurinville, Huy Linh Dao, 2020-08-11 This book deals with the linguistic treatment of tense, aspect, modal, evidential TAME expressions in translations of the French novel *L'Étranger* by Albert Camus into sixteen languages. It is strongly empirical in spirit and uses the method of contrastive linguistics and multilingual comparison through the use of parallel corpora. It has five main parts: the first two offer insights into perfect and imperfect tenses in Indo-European languages; the third part shifts the focus on non-Indo-European languages; the fourth part deals with modality; and the last part is more translation-oriented. These contents make this book a valuable contribution in semantic micro-typology. In terms of readership, both linguists and specialists in translation, as well as literature scholars, can benefit from the contributions presented in this book. It also relates to other usage-based corpus-driven studies of TAME phenomena and to monographs that take as their object of study the use of corpus linguistics in translation studies. **Verb Movement** David Lightfoot, Norbert Hornstein, 1994-03-31 Work on the movement of phrase categories, mostly Noun Phrases, has been a central element of syntactic theorizing almost since the earliest work on generative grammar. Work on the movement of lexical elements, heads, has been much less central until recent years. Verb movement is now, however, the center of current research in syntax. Parallel to the theoretical interest has been the attention focused on the description of verb second languages and on the movement operations that place the verb in its second position. This volume represents the latest work from many of the leading researchers in an important field and draws on analyses from a wide range of languages. It will have a significant impact on its field. *Analogy and Contrast in Language* Karolina Krawczak, Barbara Lewandowska-Tomaszczyk, Marcin Grygiel, 2022-10-15 Within cognitive and functional approaches to language structure and grammaticality, analogy and contrast represent two fundamental human cognitive capacities which up to now have mostly been examined separately. This volume seeks to bridge that gap and, in doing so, it brings together cutting-edge theoretical and empirical research in the field. The chapters in this book examine analogy and contrast across a variety of languages: English, Finnish, Hungarian, Polish, Russian, for different language phenomena: constructions, lexical semantics, morphology.

Crosslinguistic Research in Syntax and Semantics Raffaella Zanuttini, Héctor Campos, Elena Herburger, Paul H. Portner, 2006-05-19 Presenting cutting edge research in syntax and semantics this important volume furthers theoretical claims in generative linguistics and represents a significant addition to present scholarship in the field Leading scholars present crosslinguistic studies dealing with clausal architecture negation and tense and aspect and the issue of whether a statistical model can by itself capture the richness of human linguistic abilities Taken together these contributions elegantly show how theoretical tools can propel our understanding of language beyond pretheoretical descriptions especially when combined with the insight and skills of linguists who can analyze difficult and complex data Crosslinguistic Research in Syntax and Semantics covers a range of topics currently at the center of lively debate in the linguistic literature such as the structure of the left periphery of the clause the proper treatment of negative polarity items and the role of statistical learning in building a model of linguistic competence The ten original contributions offer an excellent balance of novel empirical description and theoretical analysis applied to a wide range of languages including Dutch German Irish English Italian Malagasy Malay and a number of medieval Romance languages Scholars and students of semantics syntax and linguistic theory will find it to be a valuable resource for ongoing scholarship and advanced study

Imperative Clauses in Generative Grammar Wim van der Wurff, 2007-07-13 This volume contains ten articles exploring a wide range of issues in the analysis of the imperative clause from a generative perspective The language data investigated in detail in the articles come from Dutch English German old Scandinavian Spanish and South Slavic there is further significant discussion of data from other Germanic and Romance languages The phenomena addressed in several cases in more than one article leading to some lively debate about contentious issues include the following the nature and interpretation of imperative subjects the properties of participial imperatives clitic behavior restrictions on topicalization word order null arguments negative imperatives and imperatives in embedded clauses The volume has a substantial introduction sketching the results of earlier generative work on the topic most of it scattered across disparate outlets the issues left open by this earlier work and the contribution to further insight and understanding made by the book's articles

Meta-informative Centering in Utterances André Włodarczyk, Hélène Włodarczyk, 2013-12-15 The notion of information has nowadays become crucial both in our daily life and in many branches of science and technology In language studies this notion was used as a technical term for the first time about at least fifty years ago It is argued however that Old and New used traditionally for characterising information refer in fact to the meta informative status of communicated chunks of information They provide information about other information Since subjects and objects as attention driven phrases are also

related to aboutness the presented Meta Informative Centering MIC framework includes predication theory By applying the MIC theory to their analyses of English German French Polish Russian Greek Latin and Japanese the authors provide comprehensive explanations of the most puzzling aspects of the pragmatic use of basic universal linguistic categories It seems clear now that canonical syntactic patterns their permutations and diverse transformations do indeed reflect very truly the meta informative encapsulation of utterances As a consequence this book presents new and coherent theoretical solutions as well as their very efficient applications The Acquisition of Inflection in Q'anjob'al Maya Pedro Mateo

Pedro,2015-08-15 Most studies on the acquisition of verbal inflection have examined languages with a single verb suffix This book offers a study on the acquisition of verb inflections in Q anjob al Maya Q anjob al has separate inflections for aspect subject and object agreement and status suffixes The subject and object inflections display a split ergative pattern The subjects of intransitive verbs with aspect markers take absolutive markers whereas the subjects of aspectless intransitive verbs take ergative markers The acquisition of three types of clauses is explored in detail imperatives indicatives and aspectless complements The data come from longitudinal spontaneous speech of three monolingual Q anjob al children aged 1 8 3 5 This book contributes unique data to the debate on the acquisition of finite and non finite verbs as well as adding to our understanding of the acquisition of split ergative patterns The book is of interest to researchers and students working on linguistics and language acquisition **A Semantic and Pragmatic Model of Lexical and Grammatical Aspect** Mari B.

Olsen,2016-01-28 First Published in 1997 This work studies two related phenomena in human language the ability of verbs and other lexical items to describe how a situation event or state develops or holds in time LEXICAL ASPECT and the view some verbal auxiliaries and affixes present of the development or result of a situation at a given time GRAMMATICAL ASPECT Through this investigation the author seeks to reveal a formal situation structure represented by aspectual phenomena a structure to which other linguistic elements make reference particularly tense This structure describes the semantics of aspect and provides a principled input to pragmatic aspectual interpretation **Aspect** Bernard

Comrie,1976-06-03 An introduction to verbal aspect as a general linguistic phenomenon with examples primarily from English Slavonic and Romance languages
