English For The Thoughtful Child:

English for the Thoughtful Child Fred Scott, Gordon Southworth, Cynthia A. Shearer, 2003-01-01 Like the first volume of English for the Thoughtful Child this second volume concentrates on the development of composition skills It contains picture lessons oral and written narration exercises memory work and copy work In addition to these lessons which help build narrative and descriptive skills this book includes nature lessons which help build expository writing skills Those families who keep nature notebooks may find these lessons work well with their own nature studies Much of this book comes from Scott and Southworth's 1913 title Lessons in English The original preface describes it this way Too many teachers think of a textbook as a kind of machine gun built to fire so many loads a minute with deadly precision This is a vicious error In this book teachers will find a great variety of material which they can use in accordance with their best judgment Exercises are given for copying for dictation for rewriting for description for letter writing for recording the results of observation and experience for the use of words and their synonyms and for practice in the use of correct forms Ample provision is made for the correlation of nature work with language and the elements of grammar are inductively presented The end of all instruction in English is growth in power of expression and appreciation Drill which contributes to this end is good Drill which falling short of this end merely fills the child's mind with rules and symbols is a grievous waste of time These lessons exemplify the Charlotte Mason method of education The book is a continuation of the gentle thoughtful instruction in writing begun in English for the Thoughtful Child Vol 1

childhood in relation to the Indian nation Indian cultural identity and Indian girlhood From a framework of postcolonial and feminist theories children s novels published between 1988 and 2008 in India are compared with those from the United Kingdom and North America from the same period considering the differing ideologies and the current textual constructions of childhood at play in each Broadly Superle contends that over the past twenty years an aspirational view of childhood has developed in this literature a view that positions children as powerful participants in the project of enabling positive social transformation Her main argument formed after recognizing several overarching thematic and structural patterns in more than one hundred texts is that the novels comprise an aspirational literature with a transformative agenda they imagine apparently empowered child characters who perform in diverse ways in the process of successfully creating and shaping the ideal Indian nation their own well adjusted bicultural identities in the diaspora and or their own empowered girlhoods Michelle Superle is a Professor in the department of Communications at Okanagan College She has taught children s literature composition and creative writing courses at various Canadian universities and has published articles in Papers and IRCL
