English Thought In 19th Century:

A Companion to Nineteenth-Century Britain Chris Williams, 2008-04-15 A Companion to Nineteenth Century Britain presents 33 essays by expert scholars on all the major aspects of the political social economic and cultural history of Britain during the late Georgian and Victorian eras Truly British rather than English in scope Pays attention to the experiences of women as well as of men Illustrated with maps and charts Includes guides to further reading Contemporary Thought on Nineteenth Century Socialism Ophélie Siméon, 2020-12-14 This first volume will showcase the richness and diversity of the Owenite movement which spanned decades from Owen's first published books in 1813-16 to the late 1840s political allegiances genders and continents This volume therefore calls for a variety of sources not easily available elsewhere including books pamphlets correspondence and newspaper articles and a variety of often overlapping voices from Chartists to early co-operators secularists non-British Owenites and proponents of women's rights The sheer range of Owenite ventures intentional communities co-operatives labour exchanges and experiments in popular education will be covered thus blending social and political history The attempt to map the Owenite movement will eventually lead to the identification of its shared core principles and values internationalism co-operation concepts of political change and above all the ideal of community Hidden Multilingualism in 19th-Century European Literature Jana-Katharina Mende, 2023-08-21 The disparagement of multilingualism is a European development of the 18th and 19th centuries in which one national language and national literature were advocated established and institutionalised Multilingual writers made use of the creative potential of several languages even then However they often adapted to an increasingly monolingual book market which made their individual multilingualism invisible This is evident in literary historiography which established a monolingual national canon Researching hidden multilingualism is often difficult since multilingual texts by multilingual writers were often not published or were published in a monolingual version sources are scarce Literary histories of the time often do not mention multilingualism Furthermore many multilingual writers were members of minority groups women Jewish Non-European and thus often neglected The volume offers methods and theories to systematically approach this hidden material as well as case studies on authors and national literatures in a multilingual context It thus contributes to the restructuring of a multilingual transnational literary history that is applicable to different philologies **English Prose of the Nineteenth Century** Hilary Fraser, Daniel Brown, 2017-07-12 Hilary Fraser provides a comprehensive and thorough survey of English prose in the nineteenth century which draws from a wide variety of fields including art literary theory and criticism biography letters journals sermons and travel reportage Through these works the cultural social literary and political life of the twentieth century a period of great intellectual activity can be charted discussed and assessed For the first time an inclusive critical survey of nineteenth century non-fiction is presented that traces the century's ideological and cultural upheavals as they are registered in the literary textures of some of its most widely read and influential writings The book

explores the relations between writers who are generally perceived as occupying different discursive spheres for example between John Stuart Mill Florence Nightingale and Mrs Beeton between Cardinal Newman Elizabeth Gaskell and Hannah Cullwick and between Charles Darwin David Livingstone and Henry Mayhew The establishment and development of different genres and their interactions over the century are clearly mapped The genre of the periodical essay a distinctively modern and flexible form catering to the mass readership is the subject of the introduction and then more specialist fields are discussed covering scientific writing travel and exploration literature social reportage biography autobiography journals letters religious and philosophical prose political writing and history

Cambridge Theology in the Nineteenth Century

David M. Thompson, 2017-03-02 Many books have been written about nineteenth century Oxford theology but what was happening in Cambridge This book provides the first continuous account of what might be called the Cambridge theological tradition by discussing its leading figures from Richard Watson and William Paley through Herbert Marsh and Julius Hare to the trio of Lightfoot Westcott and Hort It also includes a chapter on nonconformists such as Robertson Smith P T Forsyth and T R Glover The analysis is organised around the defences that were offered for the credibility of Christianity in response to hostile and friendly critics In this period the study of theology was not yet divided into its modern self contained areas A critical approach to scripture was taken for granted and its implications for ecclesiology the understanding of salvation and the social implications of the Gospel were teased out in Hort's phrase through enquiry and controversy as a way to discover truth Cambridge both engaged with German theology and responded positively to the nineteenth century crisis of faith

Economists and Higher Learning in the Nineteenth Century

William J. Barber, 1993-01-01 Many economists who struggled to establish a secure place for their discipline in American universities in the nineteenth century made significant contributions to reshaping American academic life in general Yet they were often at war among themselves as they sought to define the mission and methods of economics in an era of social and intellectual ferment This volume represents the contribution of American scholars to a multinational research project on the institutionalization of political economy in European Japanese and North American universities It includes case studies of divergent experiences of fourteen institutions that figured prominently in the molding of American culture William Mary The University of Virginia South Carolina College Brown Harvard Yale Columbia Johns Hopkins The University of Pennsylvania The University of Chicago The University of California Stanford The University of Wisconsin and the Massachusetts Institute of Technology These are supplemented in an essay by A W Coats on the turbulent early decades of the American Economic Association In this new introduction Barber takes note of the fact that in a somewhat different context and with a modified rhetoric the same issues present themselves today as they did one hundred years earlier And this in turn introduces some troubling concerns about just what sort of science economics is and was The volume as a whole can be read as reflections on the troubled status of the discipline of economics as it now exists in American university and research contexts It provides fresh perspectives on the development of social science and economic thought and on the history of higher education in the United States As such it will be of very great interest to professional economists students of higher education and those for whom the life of American ideas holds a central place

The Irish through British Eyes Edward Lengel, 2002-05-30

The mainstream British attitude toward the Irish in the first half of the 1840s was based upon the belief in Irish improvableity. Most educated British rejected any notion of Irish racial inferiority and insisted that under middle class British tutelage the Irish would in time reach a standard of civilization approaching that of Britain. However the potato famine of 1846-1852 which coincided with a number of external and domestic crises that appeared to threaten the stability of Great Britain led a large portion of the British public to question the optimistic liberal attitude toward the Irish. Rhetoric concerning the relationship between the two peoples would change dramatically as a result. Prior to the famine the perceived need to maintain the Anglo Irish union and the subservience of the Irish was resolved by resort to a gendered rhetoric of marriage. Many British writers accordingly portrayed the union as a natural necessary and complementary bond between male and female maintaining the appearance if not the substance of a partnership of equals. With the coming of the famine the unwillingness of the British government and public to make the sacrifices necessary not only to feed the Irish but to regenerate their island was justified by assertions of Irish irredeemability and racial inferiority. By the 1850s Ireland increasingly appeared not as a member of the British family of nations in need of uplifting but as a colony whose people were incompatible with the British and needed to be kept in place by force of arms.
