Hamilton, 2007 The landed classes saw themselves as having a relationship to the landscape that was very different from that of the commercial and less wealthy segments of society Based upon architectural writings letters diaries and journals it is clear that through shared interests and values by the early nineteenth century England's landowning elite had successfully transformed parts of some of the country's towns and cities particularly London and Bath into fragmented shared and more familiar settings for enjoying the lifestyle that had traditionally set them apart from the masses *The Invention of the English Landscape* Peter Borsay, Rosemary Sweet, 2023-07-27 Since at least the Reformation English men and women have been engaged in visiting exploring and portraying in words and images the landscape of their nation *The Invention of the English Landscape* examines these journeys and investigations to explore how the natural and historic English landscape was reconfigured to become a widely enjoyed cultural and leisure resource Peter Borsay considers the manifold forces behind this transformation such as the rise of consumer culture the media industrial and transport revolutions the Enlightenment Romanticism and the Gothic revival In doing so he reveals the development of a powerful bond between landscape and natural identity against the backdrop of social and political change from the early modern period to the start of the Second World War Borsay's interdisciplinary approach demonstrates how human understandings of the natural world shaped the geography of England and uncovers a wealth of valuable material from novels and poems to paintings that expose historical understandings of the landscape This innovative approach illuminates how the English countryside and historic buildings became cultural icons behind which the nation was rallied during war time and explores the emergence of a post war heritage industry that is now a definitive part of British cultural life **Cross-Cultural Design** Pei-Luen Patrick Rau, 2016-07-04 This book constitutes

**The German Spa in the Long Eighteenth Century** Ute Lotz-Heumann, 2021-07-25 Shifting the focus from the medical use of spas to their cultural and social functions this study shows that eighteenth and early nineteenth century German spas served a vital role as spaces where new ways of perceiving the natural environment and conceptualizing society were disseminated Although spas continued to be places of health and healing their function and perception in central Europe changed fundamentally around the middle of the eighteenth century This transformation of the role of the spa occurred in two ways First the spa popularized a new perception of the landscape with a preference for mountains and the seacoast forming the basis for the cultural assumptions underlying modern tourism Second contemporaries perceived spas as meeting places comparable to institutions of Enlightenment sociability like coffeehouses salons and Masonic lodges Spas were conceived as spaces where the nobility and the bourgeoisie could interact on an equal footing thereby overcoming the constraints of early modern social boundaries These changes were negotiated through both personal interactions at spas and an increasingly sophisticated published spa discourse The late eighteenth and early nineteenth century German spa thus helped to bring about social and cultural modernity
