Language, Syntax, and the Natural Sciences Ángel J. Gallego, Roger Martin, 2018-10-18 Language, apart from its cultural and social dimension, has a scientific side that is connected not only to the study of grammar in a more or less traditional sense but also to disciplines like mathematics, physics, chemistry and biology. This book explores developments in linguistic theory, looking in particular at the theory of generative grammar from the perspective of the natural sciences. It highlights the complex and dynamic nature of language, suggesting that a comprehensive and full understanding of such a species-specific property will only be achieved through interdisciplinary work.

Word Mariam Motamedi Fraser, 2015-09-16 Words are everywhere. Ubiquitous, pervasive. Yet our relations with words are narrowly defined. How does the sound, feel, touch, taste, place, position, speed and direction of words come to matter in their uses? Word begins from the premise that if we consider words only in terms of language and as images, we overlook a range of bodily, sensory, affective and non-conscious relations with words. We overlook too their epistemological, methodological, experiential and political implications. This book seeks to redress this neglect by exploring words themselves in histories of language and contemporary theory in print and typography and through a series of empirical examples which

English Pronunciation Models in a Globalized World Andrew Sewell, 2016-04-14 This book explores the topics of English accents and pronunciation. It highlights their connections with several important issues in the study of English in the world including intelligibility, identity and globalization. The unifying strand is provided by English pronunciation models: what do these models consist of and why? The focus on pronunciation teaching is combined with sociolinguistic perspectives on global English and the wider question asked by the book is what does it mean to teach English pronunciation in a globalized world. The book takes Hong Kong Asia's World City as a case study of how global and local influences interact and of how decisions about teaching need to reflect this interaction. It critically examines existing approaches to global English such as World Englishes and English as a Lingua Franca and considers their contributions as well as their limitations in the Hong Kong context. A data-based approach with quantitative and qualitative data anchors the discussion and assists in the development of criteria for the contents of pronunciation models. *English Pronunciation Models in a Globalized World: Accent, Acceptability and Hong Kong English* discusses among other issues: Global English, A socio-linguistic toolkit, Accents and Communication, Intelligibility in global English, Teaching English Pronunciation, The models debate, Somewhere Between Accent and pronunciation in Hong Kong. Researchers and practitioners of English studies and applied linguistics will find this book an insightful resource.
