**The Origins of the British Colonies** George Beer, 2018-01-19 Modern political science is based upon the fundamental proposition that the state is an organic entity Consequently its history like that of any other organism is twofold in nature internal and external Its internal development finds expression in the constitutional economic and social systems and in ultimate analysis is merely a succession of compromises securing a temporary equilibrium between the claims of the individual to complete freedom of action and the opposing efforts of society to force the individual to subordinate his own particular interests to those of the commonwealth The state however is not an isolated unit but lives in an environment of other political organisms and its external activity is conditioned by this fact Internal development and external growth react mutually upon each other and a period of marked successful readjustment of the social forces within the body politic is usually followed by years of quiet in internal affairs and of corresponding activity in

outward expansion and so on in a regular series Though at all times profoundly influenced by the course of internal development the colonizing activities of the state are naturally primarily a part of its international history     **Proceedings of the United States Naval Institute** United States Naval Institute,1921     *Geographical Inquiry and American Historical Problems* Carville Earle,1992 Geography s mission is to comprehend changes on the earth s surface and toward that end geographers ponder the interactive effects of nature and culture within specific locations and times This entails connecting human actions historical events with their immediate environs ecological inquiry and specific coordinates of place and region locational inquiry Most of the essays in this volume employ the variant of ecological inquiry the author calls the staple approach focusing on primary production agriculture forestry fishing and its societal ramifications Locational inquiry queries the spatial distribution of historical events Why was mortality in early Virginia highest in a small zone along the James River Why did cities flourish in early Pennsylvania Massachusetts and Carolina and not elsewhere along the Atlantic seaboard Why was Boston the vanguard of the American Revolution     *Lectures on British Colonization and Empire* Frederick Alexander Kirkpatrick,League of the Empire,1906     **Walter Raleigh** Alan Gallay,2019-11-19 From a Bancroft Prize winning historian a biography of the famed poet courtier and colonizer showing how he laid the foundations of the English Empire Sir Walter Raleigh was a favorite of Queen Elizabeth She showered him with estates and political appointments He envisioned her becoming empress of a universal empire She gave him the opportunity to lead the way In Walter Raleigh Alan Gallay shows that while Raleigh may be best known for founding the failed Roanoke colony his historical importance vastly exceeds that enterprise Inspired by the mystical religious philosophy of hermeticism Raleigh led English attempts to colonize in North America South America and Ireland He believed that the answer to English fears of national decline resided overseas and that colonialism could be achieved without conquest Gallay reveals how Raleigh launched the English Empire and an era of colonization that shaped Western history for centuries after his death     Pocahontas, the age of English colonization John Roy Musick,1907     *United States Naval Institute Proceedings* United States Naval Institute,1921     **English Colonization Ideas in the Reign of Elizabeth ...** Curtis Manning Geer,1895
