It focuses in particular on the relationship between the dance profession and dance hall industry and the consumers who formed the dancing public. Together these groups negotiated the creation of a national dancing style which constructed, circulated and commodified ideas about national identity. At the same time the book emphasizes the global exploring the impact of international cultural products on national identity construction, the complexities of Americanisation and Britain's place in a transnational system of production and consumption that forged the dances of the Jazz Age.

Expressing and Describing Surprise Agnès Celle, Laure Lansari, 2017-07-18. Among emotions, surprise has been extensively studied in psychology. In linguistics, surprise like other emotions has mainly been studied through the syntactic patterns involving surprise lexemes. However, little has been done so far to correlate the reaction of surprise investigated in psychological approaches and the effects of surprise on language. This cross-disciplinary volume aims to bridge the gap between emotion, cognition and language by bringing together nine contributions on surprise from different backgrounds: psychology, human-agent interaction, linguistics. Using different methods at different levels of analysis, all contributors concur in defining surprise as a cognitive operation and as a component of emotion rather than as a pure emotion. Surprise results from expectations not being met and is therefore related to epistemicity. Linguistically, there does not exist an unequivocal marker of surprise. Surprise may be either described by surprise lexemes which are often associated with figurative language or it may be expressed by grammatical and syntactic constructions.
