English Matters Vol 8:

Correct English, 1901 *Extreme Britain* Elizabeth Pearson, 2024-01-01 In this fascinating study Pearson presents nearly a decade's worth of research into Britain's radical right. Since her findings rely on interviews with extremists, Pearson must also address the ethical difficulties arising from quoting these harmful ideologies in print. This results in an interesting methodological discussion which contrasts presence of empathy, understanding and condemnation in her interview experiences. *Security Women* **Unequal Englishes** R. Tupas, 2015-05-26 This book proposes, examines and unpacks the notion of unequal Englishes as a way to understand English today. Unlike many studies on the pluralization of English, the volume assumes that inequalities and Englishes are inextricably linked and must be understood and theorized together.

Defense Issues, 1993 **Preventive Diplomacy In Non-traditional Security Issues: Asean-china Public Health And Environmental Cooperation** Yue Yang, Youlin Qiao, 2024-08-27 As a key part and parcel of sustainable development of ASEAN-China relations, cooperation in non-traditional security issues has become a new growth area for both sides. This book is divided into three parts. The first part takes stock of Public-Private Partnership (PPP) in 30 years of ASEAN-China public health cooperation, covering topics such as digital health and personnel training, cooperation in global vaccine distribution and PPP in public health in Laos, Myanmar and Vietnam. The second part explores how to reconnect ASEAN and China, which includes sharing the experiences of member states on vaccine multilateralism and offering proposals for practicable and safer regional standards to institute green lanes, travel bubbles and COVID-19 travel passports to strengthen the regional economy, especially in mass tourism. The third part introduces ASEAN-China cooperation on Nature-based Solutions (NBS) to environmental issues, including Southeast Asia's vulnerability to climate change and its Low Carbon Pathway and NBS for climate change adaptation in Vietnam's Mekong Delta. **Microlithography** Bruce W. Smith, Kazuaki Suzuki, 2020-05-01 The completely revised Third Edition to the bestselling *Microlithography: Science and Technology* provides a balanced treatment of theoretical and operational considerations from fundamental principles to advanced topics of nanoscale lithography. The book is divided into chapters covering all important aspects related to the imaging materials and processes that have been necessary to drive semiconductor lithography toward nanometer-scale generations. Renowned experts from the world's leading academic and industrial organizations have provided in-depth coverage of the technologies involved in optical deep ultraviolet (DUV) immersion, multiple patterning, extreme ultraviolet (EUV) maskless nanoimprint and directed self-assembly lithography, together with comprehensive descriptions of the advanced materials and processes involved. New in the Third Edition: In addition to the full revision of existing chapters, this new Third Edition features coverage of the technologies that have emerged over the past several years, including multiple patterning lithography, design for manufacturing, design process technology, co-optimization, maskless lithography and directed self-assembly. New advances in lithography modeling are covered as well as fully updated information detailing the new technologies, systems, materials and processes for optical

UV DUV immersion and EUV lithography The Third Edition of Microlithography Science and Technology authoritatively covers the science and engineering involved in the latest generations of microlithography and looks ahead to the future systems and technologies that will bring the next generations to fruition Loaded with illustrations equations tables and time saving references to the most current technology this book is the most comprehensive and reliable source for anyone from student to seasoned professional looking to better understand the complex world of microlithography science and technology

Subject Matter Aron Vinegar,2023-11-28 A theorization of habit that emphasizes its excessive and unsettling qualities

rather than its mediating adaptive and stabilizing functions Subject Matter offers a bold counterpoint to prevalent conceptions of habit characterized by bodily fluidity and ease as the stabilizing foundation of an emerging subjectivity or more negatively as a numbing and deadening force Instead of facilitating the coordination of action with goal and self with environment habit appears here as a disruptively recursive operation with extreme ontological implications that are often more quotidian than exceptional Vinegar theorizes habit's more perturbing aspects from repetition compulsion to kenosis to breakdown through an encounter between Hegel's philosophy of habit psychoanalytic dimensions of repetition Tom McCarthy's novel *Remainder* and Omer Fast's feature length film interpretation of the novel Vinegar starts with the premise that habit is an unhappy mediator a disturbance of the very medium and milieu that is constitutive of the subject Subject Matter pays close attention to those aspects of habit that are usually considered deviations from or potential threats to habit proper and that generate a logic of breakdown automaticity mechanization thingness inertia and fixity By plotting a topology of habit's unbearability through detailed accounts of its manifestation in writing art aesthetics and visuality and through an attentiveness to the unbalanced nonrelations between mediation and immediacy being and having fixity and fluidity vanishing and overflowing abbreviation and excess beginning and ending Vinegar exposes habit's failure to mediate and inhabit In doing so he offers new and counterintuitive insights into how habit generates the unruly grounds it is supposed to settle thus allowing us to ask how we might break down differently
