**The Enigma of Automobility** Sudhir Chella Rajan, 2010-11-23 Rajan investigates air pollution policy as one based on how to make cars less polluting Putting the onus on auto manufacturers and owners has generated an elaborate scheme of emissions testing and pollution control devices and does not look at the technology itself as the heart of the problem Rajan focuses his study on data collected in Los Angeles to show how emissions testing burdens the poor who tend to own older cars that pollute more Rajan argues for democratic control over technology steering it away from special interest groups and toward a long term ethical resolution **The Automobile in American History and Culture** Michael L.

Post-Automobility Futures Robert Braun, Richard Randell, 2022-03-04 This book presents an in depth phenomenological and deconstructive analysis of the automobility imaginary which is none other than the mundane automobility reality within which we dwell in everyday life A successful transition to a post automobility future will require new ways of thinking about and conceptualizing automobility one of the most significant and powerful imaginaries of contemporary neo liberalism This book offers such a view by reconceptualizing automobility in its entirety as both an imaginary and a dreamscape In order to address the challenges externalities and tragedies that automobility has brought upon us automobility we argue must end as we know it

**Handbook of Global Environmental Politics** Peter Dauvergne, 2012-01-01 The second edition of this Handbook contains more than 30 new and original articles as well six essential updates by leading scholars of global environmental politics This landmark book maps the latest theoretical and empirical research in this energetic and growing field Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics It makes a case for an expansive definition of the field one that embraces an interdisciplinary literature on the

connections between global politics and environmental change The remaining chapters are divided into four broad themes states and cooperation global governance the political economy of governance and knowledge and ethics with each section covering key emerging issues In depth explorations are given to topics such as climate change multinational corporations international agreements and UN organizations regulations and business standards trade and international finance multilevel and transnational governance and ecological citizenship Handbook of Global Environmental Politics Second Edition is a comprehensive review of the field and offers cutting edge ideas for further research As such scholars students and policymakers will find themselves looking to it for many years to come *The A to Z of Environmentalism* Peter Dauvergne, 2009-09-02 Environmentalism involves hundreds of international environmental groups thousands of national groups and tens of thousands of local ones It also includes hundreds of international agreements hundreds of national environmental agencies and countless environmental sections in other organizations from those in multinational corporations to ones in regional and international organizations Such environmental concepts as sustainable development the precautionary principle corporate social responsibility and eco labeling percolate from all of these sources Every year new ideas refinements policies institutions markets and problems continue to enter into environmental debates and discourses making it nearly impossible to keep abreast of the changes constantly taking place The A to Z of Environmentalism is a paperback edition of the Historical Dictionary of Environmentalism It strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This goal is accomplished through a chronology an introductory essay and over 300 cross referenced dictionary entries Gary Bryner, The Historical Dictionary of Environmentalism strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This is done through a chronology a list of acronyms and abbreviations an introductory essay and over 300 cross referenced dictionary entries The Urban Political Economy and Ecology of Automobility Alan Walks, 2014-07-25 Just how resilient are our urban societies to social energy environmental and or financial shocks and how does this vary among cities and nations Can our cities be made more sustainable and can environmental economic and social collapse be staved off through changes in urban form and travel behaviour How might rising indebtedness and the recent series of financial crises be related to automobile dependence and patterns of urban automobile use To what extent does the system and economy of automobility factor in the production of urban socio spatial inequalities and how might these inequalities in mobility be understood and measured What can we learn from the politics of mobility and social movements within cities What is the role of automobility and auto dependence in differentiating groups both within cities and rural areas and among transnational migrants moving across international borders These are just some of the questions this book addresses This volume provides

a holistic and reflexive account of the role played by automobility in producing reproducing and differentiating social economic and political life in the contemporary city as well as the role played by the city in producing and reproducing automobile inequalities The first section titled Driving Vulnerability deals with issues of global importance related to economic social financial and environmental sustainability and resilience and socialization The second section Driving Inequality is concerned with understanding the role played by automobility in producing urban socio spatial inequalities including those rooted in accessibility to work migration status and ethnic concentration and new measures of mobility based inequality derived from the concept of effective speed The third section titled Driving Politics explores the politics of mobility in particular places with an eye to demonstrating both the relevance of the politics of mobility for influencing and reinforcing actually existing neoliberalisms and the kinds of politics that might allow for reform or restructuring of the automobile city into one that is more socially politically and environmentally just In the conclusion to the book Walks draws on the findings of the other chapters to comment on the relationship between automobility neoliberalism and citizenship and to lay out strategies for dealing with the urban car system

*Building Sustainable Communities*, 2006-01-01 In this interdisciplinary follow up to *Future as Fairness Ecological Justice and Global Citizenship* edited by Haugstad and Wulfhorst Rodopi 2004 14 chapters explore a variety of conceptual and practical pathways to the building of sustainable communities Five chapters provide different perspectives on sustainable and unsustainable agriculture Other cases explored are wildlife valuations distributional effects of environmental policy the emerging American nuclear power renaissance regulation of care use job losses with a raising GDP cooperation between labour and environmentalists plant biotechnology participatory decision making acoustic ecology decent competition and fractality as a key to global citizenship and ecological justice The introduction sketches a framework for constructive evaluation of the interrelationships between environmental sustainability economic sustainability communities and social interactions

**The Routledge Companion to Automobile Heritage, Culture, and Preservation** Barry L. Stiefel, Jennifer Clark, 2019-12-06 The Routledge Companion to Automobile Heritage Culture and Preservation explores automotive heritage its place in society and the ways we might preserve and conserve it Drawing on contributions from academics and practitioners around the world and comprising six sections this volume carries the heritage discourse forward by exploring the complex and sometimes intricate place of automobiles within society Taken as a whole this book helps to shape how we think about automobile heritage and considers how that heritage explores a range of cultural intellectual emotional and material elements well outside of the automobile body itself Most importantly perhaps it questions how we might better acknowledge the importance of automotive heritage now and in the future The Routledge Companion to Automobile Heritage Culture and Preservation is unique in that it juxtaposes theory with practice academic approaches with practical experience and recognizes that issues of preservation and conservation belong in a broad context As such this volume should be essential reading for both academics and practitioners with an interest in

automobiles cultural heritage and preservation

**Historical Dictionary of Environmentalism** Peter

Dauvergne, 2016-09-09 To capture the diversity within environmentalism this dictionary takes a global tack with a focus on ideas events institutions initiatives and green movements since the 1960s It strives to avoid a common error in many histories of environmentalism to exaggerate the input of the wealthy countries of Europe and North America and understate the influence of Africa Asia South and Central America and the Polar Regions It aims as well for a more comprehensive analysis than most histories of the modern environmental movement understanding environmentalism as emerging not only from grassroots and formal nongovernmental associations but also from corporate governmental and intergovernmental organizations and initiatives This assumes the ideas and energy infusing environmentalism with political purpose arise from hundreds of thousands of sources from corporate boardrooms to bureaucratic policies to international negotiations to activists Thus environmentalists are not only indigenous people blocking a logging road Greenpeace activists protesting a seal hunt or green candidates contesting an election an equal or larger number of environmentalists are working within the Japanese bureaucracy to implement environmental policies within the World Bank to assess the environmental impacts of loans within Wal Mart to green its purchasing practices or within intergovernmental forums to negotiate international environmental agreements This second edition of Historical Dictionary of Environmentalism contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced entries on important events issues organizations ideas and people shaping the direction of environmentalism worldwide This book is an excellent access point for students researchers and anyone wanting to know more about environmentalism *Engaging the Everyday* John

M. Meyer, 2015-03-13 Meyer pioneers a uniquely political approach to environmental social criticism that follows from a startling central proposition that it is not outright oppression and denialism that are the most significant impediments but what he aptly terms the resonance dilemma This is the failure of climate and environmental challenges however important we may grant that they are to strike us as integral everyday concerns This lively eloquent accessible volume models the very style of social criticism that it calls for in response to this dilemma a resonant environmental criticism that works on rather than against everyday practices Lisa Disch Department of Political Science University of Michigan Ann Arbor author of *Hannah Arendt and the Limits of Philosophy* One Less Car Zachary Mooradian Furness, Zack Furness, 2010-03-12 The

power of the bicycle to impact mobility technology urban space and everyday life **The Greening of Everyday Life** John M. Meyer, Jens Kersten, 2016 This interdisciplinary volume develops a distinctive new way of talking about environmental concerns in post industrial society **The Oxford Handbook of Environmental Ethics** Stephen Mark Gardiner, Allen Thompson, 2017 We live during a crucial period of human history on Earth Anthropogenic environmental changes are occurring on global scales at unprecedented rates Despite a long history of environmental intervention never before has the collective impact of human behaviors threatened all of the major bio systems on the planet Decisions we make today will

have significant consequences for the basic conditions of all life into the indefinite future What should we do How should we behave In what ways ought we organize and respond The future of the world as we know it depends on our actions today A cutting edge introduction to environmental ethics in a time of dramatic global environmental change this collection contains forty five newly commissioned articles with contributions from well established experts and emerging voices in the field Chapters are arranged in topical sections social contexts history science economics law and the Anthropocene who or what is of value humanity conscious animals living individuals and wild nature the nature of value truth and goodness practical reasons hermeneutics phenomenology and aesthetics how things ought to matter consequences duty and obligation character traits caring for others and the sacred essential concepts responsibility justice gender rights ecological space risk and precaution citizenship future generations and sustainability key issues pollution population energy food water mass extinction technology and ecosystem management climate change mitigation adaptation diplomacy and geoengineering and social change conflict pragmatism sacrifice and action Each chapter explains the role played by central theories ideas issues and concepts in contemporary environmental ethics and their relevance for the challenges of the future A Social Theory

of Corruption Sudhir Chella Rajan,2020-12-01 A social theory of grand corruption from antiquity to the twenty first century In contemporary policy discourse the notion of corruption is highly constricted understood just as the pursuit of private gain while fulfilling a public duty Its paradigmatic manifestations are bribery and extortion placing the onus on individuals typically bureaucrats Sudhir Chella Rajan argues that this understanding ignores the true depths of corruption which is properly seen as a foundation of social structures Not just bribes but also caste gender relations and the reproduction of class are forms of corruption Using South Asia as a case study Rajan argues that syndromes of corruption can be identified by paying attention to social orders and the elites they support From the breakup of the Harappan civilization in the second millennium BCE to the anticolonial movement in the late nineteenth and early twentieth centuries elites and their descendants made off with substantial material and symbolic gains for hundreds of years before their schemes unraveled Rajan makes clear that this grander form of corruption is not limited to India or the annals of global history Societal corruption is endemic as tax cheats and complicit bankers squirrel away public money in offshore accounts corporate titans buy political influence and the rich ensure that their children live lavishly no matter how little they contribute These elites use their privileged access to power to fix the rules of the game legal structures and social norms benefiting themselves even while most ordinary people remain faithful to the rubrics of everyday life **Age of Auto Electric** Matthew N.

Eisler,2022-12-06 The electric vehicle revival reflects negotiations between public policy which promotes clean fuel efficient vehicles and the auto industry which promotes high performance vehicles Electric cars were once as numerous as internal combustion engine cars before all but vanishing from American roads around World War I Now we are in the midst of an electric vehicle revival and the goal for a sustainable car seems to be within reach In Age of Auto Electric Matthew N Eisler

shows that the halting development of the electric car in the intervening decades was a consequence of tensions between environmental energy and economic policy imperatives that informed a protracted reappraisal of the automobile system. These factors drove the electric vehicle revival, argues Eisler, hastening automaking's transformation into a science-based industry in the process. Challenging the common assumption that the electric vehicle revival is due to the development of better batteries, *Age of Auto Electric* instead focuses on changing environmental and socioeconomic conditions, energy and environmental policies, systems of energy conversion and industrial production, and innovation practices that affected the prevalence and popularity of electric vehicles in recent decades. Eisler describes a world in transition from legacy to alternative energy conversion systems and the promises, compromises, new problems, and unintended consequences that enterprise has entailed.

**Routledge International Handbook of Social and Environmental Change** Stewart Lockie, David A. Sonnenfeld, Dana R. Fisher, 2013-10-30 This book reviews the major ways in which social scientists are conceptualizing more integrated perspectives on society and nature from the global to local levels. The chapters in this volume by international experts from a variety of disciplines explore the challenges, contradictions, and consequences of socioecological change along with the uncertainties and governance dilemmas they create.

**Driving Forces** James A. Dunn, 2010-12-01 To its critics, the automobile is a voracious consumer of irreplaceable energy resources, a leading polluter of the environment, and a destroyer of cohesive communities. The most outspoken opponents call for greater regulations and restrictions to ultimately replace the automobile as the country's primary means of transportation. But their proposals all ignore one simple fact: Americans love their cars. Millions of citizens have made the automobile the most successful method of mass transportation ever developed, and they are not about to give up the personal mobility it offers. This book presents the controversial view that for the vast majority of Americans, the automobile is not the problem but the solution to transportation needs. While acknowledging the automobile's significant drawbacks, the author refutes much of the shrill rhetoric and doomsday predictions of its opponents. He takes a skeptical look at the major policy initiatives to tax, regulate, and provide alternatives to the automobile, pointing out that any policies designed to remove Americans from their cars without offering them a superior means of mobility are worse than useless and doomed to failure. The book offers suggestions and guidelines for politically realistic initiatives that preserve the benefits of the automobile while building public support for policies that will reduce its negative effects on energy use and the environment.

**The Routledge Handbook of Mobilities** Peter Adey, David Bissell, Kevin Hannam, Peter Merriman, Mimi Sheller, 2014-01-10 The 21st century seems to be on the move, perhaps even more so than the last. With cheap travel and more than two billion cars projected worldwide for 2030, and yet all this mobility is happening incredibly unevenly at different paces and intensities with varying impacts and consequences to the extent that life on the move might be actually quite difficult to sustain environmentally, socially, and ethically. As a result, mobility has become a keyword of the social sciences, delineating a new domain of concepts, approaches, methodologies, and

techniques which seek to understand the character and quality of these trends This Handbook explores and critically evaluates the debates approaches controversies and methodologies inherent to this rapidly expanding discipline It brings together leading specialists from range of backgrounds and geographical regions to provide an authoritative and comprehensive overview of this field conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities It illustrates disciplinary trends and pathways from migration studies and transport history to communications research featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies It explores the dominant figures of mobility from children to soldiers and the mobility impaired the disparate materialities of mobility such as flows of water and waste to the vectors of viruses key infrastructures such as logistics systems to the informal services of megacity slums and the important mobility events around which our world turns from going on vacation to the commute to the catastrophic disruption of mobility systems The text is forward thinking projecting the future of mobilities as they might be lived transformed and studied and possibly brought to an end International in focus the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives different fields countries and standpoints This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study *Lebanon* Andrew Arsan, 2018-11-01

Lebanon seems a country in the grip of permanent crisis In recent years it has suffered blow after blow from Rafiq Hariri's assassination in 2005 to the 2006 July War to the current Syrian conflict which has brought a million refugees streaming into the country This is an account not just of Lebanon's high politics with its endless rows walk outs machinations and foreign alliances but also of the politics of everyday life all the stresses and strains the country's inhabitants face from electricity black outs and uncollected rubbish to stagnating wages and property bubbles Andrew Arsan moves between parliament and the public squares where protesters gather between luxury high rises and refugee camps and between expensive nightclubs and seafront promenades providing a comprehensive view of Lebanon in the twenty first century Where others have treated Lebanon's woes as exceptional a by product of its sectarianism and particular vulnerability to regional crises Arsan argues that there is nothing particular about Lebanon's predicament Rather it is a country of the age one of neoliberal economics populist fervor forced displacement rising xenophobia and public disillusion Lebanon in short offers us a lens through which to look on our times
