Understanding Art in Primary Schools Les Tickle, 2014-01-14 Even the youngest children in primary schools are now required not only to make art but also to study it developing an understanding of the huge variety of art and craft from different times and places But how do teachers actually tackle this when most have not studied art themselves This collection brings together case studies to show how a variety of teachers have used one particular art collection as a focus for practical art Throughout the voices of the children involved show us how they react to their encounters with art objects This wealth of first hand evidence and practical experience will benefit all teachers **The Art of Understanding Art** Hugh

Moss, 2015-12-03 Have we completely missed the point of the modern western revolution in the arts Hugh Moss thinks so and here he presents a refreshingly original and thought provoking new approach to understanding art It not only makes sense of western art over the past century or more but applies equally to the art of any culture at any time all within one enlightening framework that well works This new perspective is impossible to ignore a theory that places art right at the centre of the evolution of human consciousness as a key driver of the process Argued with intelligence panache and wit The Art of Understanding Art provides a delightfully entertaining read that will change the way you think about and look at art whether you are a collector or would like to be a connoisseur an academic a student or of course an artist or would like to be It is illustrated with intriguing skill depth and humour by Peter Stuart **James M.
