Literacy Matters Robert Yagelski, 2000 Literacy can empower students but it may also limit their understanding if taught without regard for the context of their lives. Using his encounters with students in high school college and state prison classrooms as well as his own experience Robert Yagelski looks at the sometimes ambiguous role of literacy in our lives and examines the mismatch between conventional approaches to teaching literacy and the literacy needs of students in a rapidly changing increasingly technological world. He asserts that ultimately the most important job of the English teacher is to reveal to students ways they can participate in the discourse that shapes their lives and he offers a timely look at how technology has influenced the way we write and read. The scope of this fascinating book reaches beyond the classroom and offers insight about what it means to be literate in an economically driven dynamic society. Addressing earlier works on the subject of literacy as well as the ideas of theorists such as Foucault this perceptive work has much to offer educators and anyone seeking to understand the nature of literacy itself. *Excel Senior High School Fundamentals of English* David Mahony, 2002 This comprehensive study guide offers coverage of all five modules in the HSC English course. *English for a Better World IV' 2007 Ed. ,*
