English Connections:

French Connections in the English Renaissance Catherine Gimelli Martin, Hassan Melehy, 2016-04-15 The study of literature still tends to be nation based even when direct evidence contradicts longstanding notions of an autonomous literary canon In a time when current events make inevitable the acceptance of a global perspective the essays in this volume suggest a corrective to such scholarly limitations the contributors offer alternatives to received notions of influence and the more or less linear transmission of *translatio studii* demonstrating that they no longer provide adequate explanations for the interactions among the various literary canons of the Renaissance Offering texts on a variety of aspects of the Anglo French Renaissance instead of concentrating on one set of borrowings or phenomena this collection points to new configurations of the relationships among national literatures Contributors address specific borrowings rewritings and appropriations of French writing by English authors in fields ranging from lyric poetry to epic poetry to drama to political treatise The bibliography presents a comprehensive list of publications on French connections in the English Renaissance from 1902 to the present day

Maps, Myths, and Men Kirsten A. Seaver,2004 The V nland Map first surfaced on the antiquarian market in 1957 and the map s authenticity has been hotly debated ever since in controversies ranging from the anomalous

English National Identity and Football Fan Culture Tom Gibbons, 2016-05-13 In recent years scholars have understood the increasing use of the St George's Cross by football fans to be evidence of a rise in a specifically English identity This has emerged as part of a wider national response to broader political processes such as devolution and European integration which have fragmented identities within the UK Using the controversial figurational sociological approach advocated by the twentieth century theorist Norbert Elias this book challenges such a view drawing on ethnographic research amongst fans to explore the precise nature of the relationship between contemporary English national identity and football fan culture Examining football fans' expressions of Englishness in public houses and online spaces the author discusses the effects of globalization European integration and UK devolution on English society revealing that the use of the St George's Cross does not signal the emergence of a specifically English national consciousness but in fact masks a more complex multi-layered process of national identity construction A detailed and grounded study of identity nationalism and globalization amongst football fans *English National Identity and Football Fan Culture* will appeal to scholars and students of politics sociology and anthropology with interests in ethnography the sociology of sport fan cultures globalization and contemporary national identities

The English diaspora in North America Tanja Bueltmann, Donald MacRaild, 2016-12-05 Ethnic associations were once vibrant features of societies such as the United States and Canada which attracted large numbers of immigrants While the transplanted cultural lives of the Irish Scots and continental Europeans have received much attention the English are far less widely explored It is assumed the English were not an ethnic community that they lacked the alienating experiences associated with immigration and thus possessed few elements of diasporas This deeply researched new book questions this assumption It shows that English associations once were widespread taking hold in colonial America spreading to Canada and then encompassing all of the empire Celebrating saints' days expressing pride in the monarch and national heroes providing charity to the national poor and forging mutual aid societies mutual were all
