approaches to the subject      **The Formation of English Gothic** Peter Draper, 2006-01-01 In this original account of architecture in England between c 1150 and c 1250 Peter Draper explores how the assimilation of new ideas from France led to an English version of Gothic architecture that was quite distinct from Gothic expression elsewhere The author considers the great cathedrals of England Canterbury Wells Salisbury Lincoln Ely York Durham and others as well as parish churches and secular buildings to examine the complex interrelations between architecture and its social and political functions Architecture was an expression of identity Draper finds and the unique Gothic that developed in England was one of a number of manifestations of an emerging sense of national identity The book inquires into such topics as the role of patrons the relationships between patrons and architects and the wide variety of factors that contributed to the process of creating a building With 250 illustrations including more than 50 in color this book offers new ways of seeing and thinking about some of England's greatest and best loved architecture      *English Romanesque Architecture Before the Conquest* Sir Alfred William Clapham, 1964      English Romanesque Architecture Alfred William Clapham, 1930      English Manuscript Studies, 1100-1700 Peter Beal, Jeremy Griffiths, 1993-01-01 Encompassing the study of manuscripts produced in the British Isles between the Conquest and the end of the seventeenth century this series provides a forum for the interdisciplinary investigation of both medieval and Renaissance manuscripts      *The English and the Normans* Hugh M. Thomas, 2003-04-10 Since the Anglo Norman period itself the relations between the English and the Normans have formed a subject of lively debate For most of that time however complacency about the inevitability of assimilation and of the Anglicization of Normans after 1066 has ruled This book first challenges that complacency then goes on to provide the fullest explanation yet for why the two peoples merged and the Normans became English Drawing on anthropological theory the latest scholarship on Anglo Norman England and sources ranging from charters and legal documents to saints' lives and romances it provides a complex exploration of ethnic relations on the levels of personal interaction cultural assimilation and the construction of identity As a result the work provides an important case study in pre-modern ethnic relations that combines both old and new approaches and sheds new light on some of the most important developments in English history      *English Medieval Sculpture* Arthur Gardner, 2011-08-11 First published in 1951 this volume provides a historical study of English sculpture during the medieval period      **Romanesque and the Past** John McNeill, Richard Plant, 2024-11-01 The nineteen papers collected in this volume explore a notable phenomenon that of retrospection in the art and architecture of Romanesque Europe They arise from a conference organized by the British Archaeological Association in 2010 and reflect its interest in how and why the past manifested itself in the visual culture of the 11th and 12th centuries This took many forms from the casual re-use of ancient material to a specific desire to re-present or emulate earlier objects and buildings Central to it is a concern for the revival of Roman and early medieval forms spolia selective quotation archaism and the construction of histories The individual essays presented here cover a wide range of topics and media the significance of consecration ceremonies in the creation of

architectural memory the rise of pictorial concepts in 12th century chronicles the creation of history in the Paris of Hugh of St Victor and the appeal of the works of Bernward of Hildesheim and of Hrabanus Maurus in the centuries after their deaths There are studies of buildings and the ideological purpose behind them at Tarragona Ripoll Cluny Pannonhalma Hungary La Roccelletta Calabria and Old St Peter s comparative studies of Trier Villenauve and Glastonbury and of Bury St Edmunds Rievaulx and Canterbury and wide ranging papers on the tantalizing evidence for an engagement with an overseas past in Ireland an Anglo Saxon past in England and a Milanese past among the aisleless cruciform churches of Augustinian Europe The volume concludes with an assessment of the very concept of Romanesque *Early Medieval Architecture* R. A. Stalley, 1999 Ranging from Gotland to Apulia Roger Stalley explores the richness and variety of European architecture in terms of the social and religious aspirations of the time with an emphasis on the symbolic significance these buildings expressed Written with style and humour the lively text includes many quotations from ancient sources providing fascinating insight into the way that medieval buildings were created and enlivening our knowledge of this period English Romanesque Architecture Alfred William Clapham, 1964 *The Long Twelfth-Century View of the Anglo-Saxon Past* Martin Brett, David A. Woodman, 2016-03-03 Scholars have long been interested in the extent to which the Anglo Saxon past can be understood using material written and produced in the twelfth century and simultaneously in the continued importance or otherwise of the Anglo Saxon past in the generations following the Norman Conquest of England In order to better understand these issues this volume provides a series of essays that moves scholarship forward in two significant ways Firstly it scrutinises how the Anglo Saxon past continued to be reused and recycled throughout the longue dur e of the twelfth century as opposed to the early decades that are usually covered Secondly by bringing together scholars who are experts in various different scholarly disciplines the volume deals with a much broader range of historical linguistic legal artistic palaeographical and cultic evidence than has hitherto been the case Divided into four main parts The Anglo Saxon Saints Anglo Saxon England in the Narrative of Britain Anglo Saxon Law and Charter and Art history and the French Vernacular it scrutinises the majority of different genres of source material that are vital in any study of early medieval British history In so doing the resultant volume will become a standard reference point for students and scholars alike interested in the ways in which the Anglo Saxon past continued to be of importance and interest throughout the twelfth century *Cross and Culture in Anglo-Norman England* John Munns, 2016 An examination of the passion and crucifixion of Christ as depicted in the visual and religious culture of Anglo Norman England The twelfth century has long been recognised as a period of unusual vibrancy and importance witnessing seminal changes in the inter related spheres of theology devotional practice and iconography especially with regard to the cross and the crucifixion of Christ However the visual arts of the period have been somewhat neglected scholarly activity tending to concentrate on its textual and intellectual heritage This book explores this extraordinarily rich and vibrant visual and religious culture offering new and exciting insights into its

significance and studying the dynamic relationships between ideas and images in England between 1066 and the first decades of the thirteenth century In addition to providing the first extensive survey of surviving Passion imagery from the period it explores those images contexts intellectual cultural religious and art historical It thus not only enhances our understanding of the place of the cross in Anglo Norman culture it also demonstrates how new image theories and patterns of agency shaped the life of the later medieval church John Munns is a Fellow of Magdalene College Cambridge *Art in England* Sara N. James, 2016-10-31 *Art in England* fills a void in the scholarship of both English and medieval art by offering the first single volume overview of artistic movements in Medieval and Early Renaissance England Grounded in history and using the chronology of the reign of monarchs as a structure it is contextual and comprehensive revealing unobserved threads of continuity patterns of intention and unique qualities that run through English art of the medieval millennium By placing the English movement in a European context this book brings to light many ingenious innovations that focused studies tend not to recognize and offers a fresh look at the movement as a whole The media studied include architecture and related sculpture both ecclesiastical and secular tomb monuments murals panel paintings altarpieces and portraits manuscript illuminations textiles and art by English artists and by foreign artists commissioned by English patrons
