English and American Tool Builders (Classic Reprint) Joseph Wickham Roe, 2017-10-12

Excerpt from *English and American Tool Builders*: The writer has tried to trace the origin and rise of tool building in America and to give something of its spread in recent years. The industrial life of the United States is so vast that a comprehensive history of even a single industry such as tool building would run far beyond the limits of one volume. This book therefore is confined to the main lines of influence in tool building and to the personalities and cities which have been most closely identified with it. The later history of American tool building has never been written. For this the writer has had to rely largely upon personal information from those who are familiar with it and who have had a part in it. Part of the material contained in this book has appeared from time to time in the *American Machinist* and the writer would acknowledge his indebtedness most of all to Mr L. P. Alford, the editor of that journal. His help and counsel have given these pages much of such value as they possess. So many have helped with information, corrections, and suggestions that acknowledgments can be made only to a few. The writer would particularly thank Mr L. D. Burlingame, Mr Ned Lawrence, Mr James Hartness, Mr Coleman Sellers, and Mr Clarence
