Qureshi, 2012-12-06 WHY WE MUST PRACTISE TRANSCULTURAL MEDICINE Health professionals and GPs should concern themselves with ethnicity religion and culture as much as with the age sex and social class of their patients Transcultural medicine is the knowledge of medical

and communication encounters between a doctor or health worker of one ethnic group and a patient of another. It embraces the physical, psychological and social aspects of care as well as the scientific aspects of culture, religion and ethnicity without getting involved in the politics of segregation or integration. Broadly speaking, the workers were in their thirties and forties and their dependent parents were in their fifties and sixties. All these will of course be 30 years older in the 1990s.
