revised edition has preserved the essential spirit and thrust of the original edition while making space for some of these new insights about the potential of values education to establish optimal and harmonious learning and social environments for both students and teachers *One-Day, One-Problem* Glen O'Grady, Elaine Yew, Karen P.L. Goh, Henk Schmidt, 2012-04-13 One day one problem is a unique adaptation of problem based learning PBL pioneered at Republic Polytechnic Singapore Here students are challenged each day with a problem from their domain and attain the necessary learning outcomes in the process of responding to the problem Throughout the day students would engage in small group discussions self directed learning and conversations with their teacher who plays the role of a facilitator This approach to learning and instruction represents a new brand of constructivist learning in a more structured learning environment compared to conventional PBL This book contains a series of chapters by authors with first hand experience in the One day one problem PBL approach Unlike other books on PBL the chapters are both research informed and practical Results of empirical studies into the factors of PBL such as quality of problems tutor behaviours scaffoldings student learning and interest are discussed together with practical implications for the educator The book begins with an overview of the one day one problem process providing a viewpoint from both the student and tutor Republic Polytechnic s pedagogical philosophy and epistemological belief of education are introduced with the intent to share how the polytechnic designed and implemented a system that supports the philosophical beliefs Results and practical implications of empirical studies on the various factors that influence students learning in PBL are discussed These include the quality of problems and the use of scaffoldings for students learning tutors as facilitators preparation of staff for PBL student assessment how students learn in the process of PBL and student interest

Problem-Based Learning in Clinical Education Susan Bridges, Colman McGrath, Tara L. Whitehill, 2012-01-05

Developed in the context of health sciences education in the late 1960s problem based learning PBL is now widely deployed as an education methodology Its problem solving collaborative student centred ethos is seen as a more appropriate system of pedagogy than earlier chalk and talk modes Focusing on its use in clinical education this collection of recent scholarship on PBL examines the ways in which PBL is both conceived and implemented in clinical education The work has a dual emphasis research driven on the one hand while on the other assessing new methodologies to explore how problem based curricula support the achievement of students learning outcomes in the context of clinical education The chapters draw on studies that explore PBL both theoretically and empirically The volume s eclecticism capitalises on the growing body of empirical research into PBL evaluations It balances this with studies analysing the relatively new area of discourse based research on PBL in action whose focus has been to interrogate the how of student learning in curricula with PBL content This publication will be of interest to clinical teachers curriculum designers and those interested in innovations in the scholarship of teaching and learning in PBL curricula ICEMS 2019 Salamah Agung, Dwi Nanto, A. Adrefiza, Aodah Diamah, Ismarita Ramayanti, 2020-01-14 Proceedings of the 5th International Conference on Education in Muslim Society ICEMS contain

papers from researchers academicians teachers school principals government agencies and consultants in various fields of education social sciences humanities Arabic and English linguistics There were 110 full papers submitted and after reviewed by at least two reviewers 39 of them are successfully published in the proceedings The articles were submitted and presented at the 5th ICEMS held by Faculty of Educational Sciences FITK supported by Center for Research and Community Service LP2M UIN Syarif Hidayatullah Jakarta The 5th ICEMS centers on the issue of creativity and innovation in teaching and learning a crucial issue to be discussed to improve the teaching and learning quality which in turn ultimately raise the overall education quality In the future the subsequent proceeding would be able to consistently grow into one prestigious annual proceeding by publishing papers from varied different fields of study particularly in education

International Research Handbook on Values Education and Student Wellbeing Terence Lovat, Ron Toomey, Neville Clement, 2010-08-05 Informed by the most up to date research from around the world as well as examples of good practice this handbook analyzes values education in the context of a range of school based measures associated with student wellbeing These include social emotional moral and spiritual growth elements that seem to be present where intellectual advancement and academic achievement are being maximized This text comes as values education widens in scope from being concerned with morality ethics civics and citizenship to a broader definition synonymous with a holistic approach to education in general This expanded purview is frequently described as pedagogy relating to values and wellbeing This contemporary understanding of values education or values and wellbeing pedagogy fits well with recent neuroscience research This has shown that notions of cognition or intellect are far more intertwined with social and emotional growth than earlier educational paradigms have allowed for In other words the best laid plans about the technical aspects of pedagogy are bound to fail unless the growth of the whole person social emotional moral spiritual and intellectual is the pedagogical target Teachers and educationalists will find that this handbook provides evidence culled from both research and practice of the beneficial effects of such a values and wellbeing pedagogy
