Miller,2014-01-02 Using the case study of Eddie as his framework Professor Miller challenges the prevailing notion that musical savants are essentially phenomenal tape recorders and deals with the issue of idiot savants in a detailed empirical investigation Through Eddie the author discusses in specific and in general topics including the background and historical context of musical savants other cases data regarding the nature of the skills exhibited and the associated developmental deficits and descriptions of a series of experiments used to define Eddie s talent Finally the author considers more general issues raised by savant behavior particularly functions served by savant behavior theories regarding its etiology and its role in general development
