## **From Swamp To Mountaintop:**

The Ghost Mountain Boys James Campbell, 2008-09-30 A harrowing portrait of a largely forgotten campaign that pushed one battalion to the limits of human suffering Despite their lack of jungle training the 32nd Division's Ghost Mountain Boys were assigned the most grueling mission of the entire Pacific campaign in World War II to march over the 10 000 foot Owen Stanley Mountains to protect the right flank of the Australian army during the battle for New Guinea Reminiscent of the classics like *Band of Brothers* and *The Things They Carried* *The Ghost Mountain Boys* is part war diary part extreme adventure tale and through letters journals and interviews part biography of a group of men who fought to survive in an environment every bit as fierce as the enemy they faced *Theirs* is one of the great untold stories of the war Superb Chicago Sun Times Campbell started out with history but in the end he has written a tale of survival and courage of near mythic proportions America in WWII magazine In this compelling and sprightly written account Campbell shines a long overdue light on the equally deserving heroes of the Red Arrow Division Military.com

**North Carolina, a Guide to the Old North State**, Best Books on, 1939 compiled and written by the Federal Writers Project of the Federal Works Agency Work Projects Administration for the state of North Carolina Sponsored by North Carolina Department of Conservation and Development

**The WPA Guide to North Carolina** Federal Writers' Project, 2013-10-31 During the 1930s in the United States the Works Progress Administration developed the Federal Writers Project to support writers and artists while making a national effort to document the country's shared history and culture The American Guide series consists of individual guides to each of the states Little known authors many of whom would later become celebrated literary figures were commissioned to write these important books John Steinbeck Saul Bellow Zora Neale Hurston and Ralph Ellison are among the more than 6 000 writers editors historians and researchers who documented this celebration of local histories Photographs drawings driving tours detailed descriptions of towns and rich cultural details exhibit each state's unique flavor

**The Myth of Emptiness and the New American Literature of Place** Wendy Harding, 2014-10-01 From the moment the first English speaking explorers and settlers arrived on the North American continent many have described its various locations and environments as empty Indeed much of American national history and culture is bound up with the idea that parts of the landscape are empty and thus open for colonization settlement economic improvement claim staking taming civilizing cultivating and the exploitation of resources In turn most Euro American nonfiction written about the landscape has treated it either as an object to be acted upon by the author or an empty space unspoiled by human contamination to which the solitary individual goes to be refreshed and rejuvenated In *The Myth of Emptiness and the New American Literature of Place* Wendy Harding identifies an important recent development in the literature of place that corrects the misperceptions resulting from these tropes Works by Rick Bass Charles Bowden Ellen Meloy Jonathan Raban Rebecca Solnit and Robert Sullivan move away from the tradition of nature writing with its emphasis on the solitary individual communing with nature in uninhabited places to

recognize the interactions of human and other than human presences in the land In different ways all six writers reveal a more historically complex relationship between Americans and their environments In this new literature of place writers revisit abandoned threatened or damaged sites that were once represented as devoid of human presence and dig deeper to reveal that they are in fact full of the signs of human activity These writers are interested in the role of social political and cultural relationships and the traces they leave on the landscape Throughout her exploration Harding adopts a transdisciplinary perspective that draws on the theories of geographers historians sociologists and philosophers to understand the reasons for the enduring perception of emptiness in the American landscape and how this new literature of place works with and against these ideas She reminds us that by understanding and integrating human impacts into accounts of the landscape we are better equipped to fully reckon with the natural and cultural crisis that engulfs all landscapes today

**A Natural History of Revolution** Mary Ashburn Miller, 2011-08-15 How did the French Revolutionaries explain justify and understand the extraordinary violence of their revolution In debating this question historians have looked to a variety of eighteenth century sources from Rousseau's writings to Old Regime protest tactics A Natural History of Revolution suggests that it is perhaps on a different shelf of the Enlightenment library that we might find the best clues for understanding the French Revolution namely in studies of the natural world In their attempts to portray and explain the events of the Revolution political figures playwrights and

journalists often turned to the book of nature phenomena such as hailstorms and thunderbolts found their way into festivals plays and political speeches as descriptors of revolutionary activity The particular way that revolutionaries deployed these metaphors drew on notions derived from the natural science of the day about regeneration purgation and balance In examining a series of tropes earthquakes lightning mountains swamps and volcanoes that played an important role in the public language of the Revolution A Natural History of Revolution reveals that understanding the use of this natural imagery is fundamental to our understanding of the Terror Eighteenth century natural histories had demonstrated that in the natural world apparent disorder could lead to a restored equilibrium or even regeneration This logic drawn from the natural world offered the revolutionaries a crucial means of explaining and justifying revolutionary transformation If thunder could restore balance in the atmosphere and if volcanic eruptions could create more fertile soil then so too could episodes of violence and disruption in the political realm be portrayed as necessary for forging a new order in revolutionary France
