The Way to the West and the Lives of Three Early Americans: Boone, Crockett, Carson Emerson Hough,2020-09-28 I ask you to look at this splendid tool the American ax not more an implement of labor than an instrument of civilization If you can not use it you are not American If you do not understand it you can not understand America This tool is so simple and so perfect that it has scarcely seen change in the course of a hundred years It lacks decoration as do the

tools and the weapons of all strong peoples It has no fantastic lines no deviations from simplicity of outline no ornamentations no irregularities It is simple severe perfect Its beauty is the beauty of utility In the shaft of the ax there is a curve This curve is there for a reason a reason of usefulness The simple swelling head is made thus not for motives of beauty but for the purpose of effectiveness The shaft an even yard in length polished curved of a formation that shall give the greatest strength to a downright blow in combination with the greatest security to the hand grasp has been made thus for a century of American life This shaft is made of hickory the sternest of American woods the one most capable of withstanding the hardest use It has always been made thus and of this material The metal head or blade of the American ax is to day as it has always been The makers of axes will tell you that they scarcely know of any other model The face of the blade is of the most highly tempered steel for a third or half of its extent The blade or bitt is about eight inches in length the cutting edge four and seven eighths to five inches in width The curve of this edge could not by the highest science be made more perfect for the purpose of biting deepest at the least outlay of human strength The poll or back of the ax is about four inches in width square or roughly rounded into such form that it is capable of delivering a pounding crushing or directing blow The weight of the ax head is about four pounds that is to say from three and one half to five pounds With the ax one can do many things With it the early American blazed his way through the trackless forests With it he felled the wood whereby was fed the home fire or the blaze by which he kept his distant and solitary bivouac With it he built his home framing a fortress capable of withstanding all the weaponry of his time With it he not only made the walls but fabricated the floors and roof for his little castle He built chairs tables beds therewith By its means he hewed out his homestead from the heart of the primeval forest and fenced it round about Without it he had been lost The Northeastern Woodlands Joseph Norman Heard,2002

Bourke,2017-04-16 John Gregory Bourke June 23 1846 June 8 1896 was a captain in the United States Army and a prolific diarist and postbellum author he wrote several books about the American Old West including ethnologies of its indigenous peoples He was awarded the Medal of Honor for his actions while a cavalryman in the Union Army during the American Civil War Based on his service during the war his commander nominated him to West Point where he graduated in 1869 leading to service as an Army officer until his death From 1870 until 1886 Captain John O Bourke served on the staff of General George Crook who Sherman described as the greatest Indian fighter the army ever had a man whose prowess was demonstrated from British America to Mexico from the Missouri River to the Pacific Ocean But On the Border with Crook is far more than a first hand account of Crook's campaigns during the Plains Indian wars and in the Southwest Alert curious and perceptive

Bourke brings to life the whole frontier scene In crisp descriptions and telling anecdotes he recreates the events and landscapes through which he moved he sketches sharp action pictures not only of Crook and his fellow cavalymen but also of such great leaders as Sitting Bull Crazy Horse and Geronimo Perhaps most important Bourke shows us how General Crook was able to achieve his most remarkable victory how this man of war won and deserved the trust of the tribes he had subjugated

On the Border with Crook (Classic Reprint) John G. Bourke, 2016-09-17 Excerpt from On the Border With Crook There is an old saw in the army which teaches that you can never know a man until after having made a scout with him in bad weather All the good qualities and bad in the human make up force their way to the surface under the stimulus of privation and danger and it not infrequently happens that the comrade who at the military post was most popular by reason of charm of manner and geniality returns from this trial sadly lowered in the estimation of his fellows and that he who in the garrison was most retiring self composed and least anxious to make a display of glittering uniform has swept all before him by the evidence he has given of fortitude equanimity courage coolness and good judgment under circumstances of danger and distress But whether the maxim be true or false it is hardly too much for me to claim a hearing while I recall all that I know of a man with whom for more than fifteen years it was my fortune to be intimately associated in all the changing vicissitudes which constituted service on the border of yesterday which has vanished never to return About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
