From Plato To Winckelmann:

Theories of Art Moshe Barasch, 2000 *Theories of Art* Moshe Barasch, 2013-09-13 This book the first in Moshe Barasch's series on art theory offers a comprehensive analysis and reassessment of major trends in European art theory and its development from the time of Plato to the early eighteenth century Barasch expertly guides the reader from the interwoven attitudes and traditions of antiquity through the writings of St Thomas Aquinas and the aesthetic values of the Middle Ages to the branching out of several disciplines art history art criticism abstract aesthetics in the late Renaissance Clearly outlining the development of art theory and exploring the central issues of each historical period *Theories of Art* is a valuable resource for the art historian as well as a stimulating introduction for the general reader *Winckelmann's "Philosophy of Art"* John Harry North, 2013-01-16 It is the aim of this work to examine the pivotal role of Johann Joachim Winckelmann 1717-1768 as a judge of classical sculpture and as a major contributor to German art criticism John Harry North seeks to identify the key features of his treatment of classical beauty particularly in his famous descriptions of large scale classical sculpture Five case studies are offered to demonstrate the academic classicism that formed the core of his philosophy of art North aims to establish Winckelmann's place in the development of the German language His prose contributed to a literary style that was suitable for the expression of an emotional response to visual experiences His use of rhetoric in the assessment of classical art however make his judgements propagandist rather than analytical The published works of Winckelmann his draft essays and his collected private correspondence are advanced as criteria in the evaluation of his impact on the development of German classicism that culminated in the Weimar group of poets and writers His Grecophile enthusiasm however led him to introduce stylistic categories in the development of classical marble sculpture that are no longer regarded as truly reflecting the evolution of Greco-Roman art Thus his historicity and his classification of styles remain in doubt Winckelmann proposed that the training of modern artists should concentrate on the observation and imitation of classical models instead of looking to nature as the source of inspiration This plan succeeded to some extent in the generation that followed his untimely death Throughout the succeeding century artists and their sponsors did favour classical models and developed stylistic classicism in European freestanding sculpture in painting and in architecture The Beautiful and the Monstrous Amaleena

Damlé, Aurélie L'Hostis, 2010 *Modern French Identities* focuses on the French and Francophone writing of the twentieth and twenty-first centuries whose formal experiments and revisions of genre have combined to create an entirely new set of literary forms The series publishes studies of individual authors and artists comparative studies and interdisciplinary projects

The Oxford Handbook of Aesthetics Jerrold Levinson, 2005-01-27 The Oxford Handbook of Aesthetics has assembled 48 brand new essays making this a comprehensive guide available to the theory application history and future of the field

Representation in Religion Jan Assmann, Albert I. Baumgartner, 2018-08-14 The role of representation in religion is complex While often perceived as essential it is also associated in many traditions with the liability of idolatry and provokes

iconoclasm The essays in this volume examine the nuances of representation in religion and the debate concerning its place across a variety of traditions from the three Abrahamic faiths to those of antiquity and the East This volume consists of presentations made at an international conference held in honor of Moshe Barasch art historian and cultural critic who has done much to elucidate the light which representation and religion shed on each other It pays tribute to Barasch by expanding the base of understanding and insight he has erected It should be of interest to students of religion and of art history

Theories of Art: From Impressionism to Kandinsky Moshe Barasch, 2000 **The Shapes of Knowledge from the Renaissance to the Enlightenment** D.R. Kelley, R.H. Popkin, 2012-12-06 The original idea for a conference on the shapes of knowledge dates back over ten years to conversations with the late Charles Schmitt of the Warburg Institute What happened to the classifications of the sciences between the time of the medieval Studium and that of the French Encyclopedie is a complex and highly abstract question but posing it is an effective way of mapping and evaluating long term intellectual changes especially those arising from the impact of humanist scholarship the new science of the seventeenth century and attempts to evaluate to apply to reconcile and to institutionalize these rival and interacting traditions Yet such patterns and transformations cannot be well understood from the heights of the general history of ideas Within the eneral framework of the organization of knowledge the map must be filled in by particular explorations and soundings and our project called for a conference that would combine some encyclopedic as well as interdisciplinary and inter national breadth with scholarly and technical depth

History of Architectural Theory Hanno-Walter Kruft, 1994 As the first comprehensive encyclopedic survey of Western architectural theory from Vitruvius to the present this book is an essential resource for architects students teachers historians and theorists Using only original sources Kruft has undertaken the monumental task of researching organizing and analyzing the significant statements put forth by architectural theorists over the last two thousand years The result is a text that is authoritative and complete easy to read without being reductive

Modern Theories of Art: From impressionism to Kandinsky Moshe Barasch, 1990 In this volume the third in his classic series of texts surveying the history of art theory Moshe Barasch traces the hidden patterns and interlocking themes in the study of art from Impressionism to Abstract Art Barasch details the immense social changes in the creation presentation and reception of art which have set the history of art theory on a vertiginous new course the decreased relevance of workshops and art schools the replacement of the treatise by the critical review and the interrelation of new modes of scientific inquiry with artistic theory and praxis The consequent changes in the ways in which critics as well as artists conceptualized paintings and sculptures were radical marked by an obsession with intense immediate sensory experiences psychological reflection on the effects of art and a magnetic pull to the exotic and alien making for the most exciting and fertile period in the history of art criticism

Key Writers on Art: From Antiquity to the Nineteenth Century Chris Murray, 2005-08-18 Key Writers on Art From Antiquity to the Nineteenth Century offers a unique and authoritative guide to theories of art from Ancient Greece to

the end of the Victorian era written by an international panel of expert contributors Arranged chronologically to provide an historical framework the 43 entries analyze the ideas of key philosophers historians art historians art critics artists and social scientists including Plato Aquinas Alberti Michelangelo de Piles Burke Schiller Winckelmann Kant Hegel Burckhardt Marx Tolstoy Taine Baudelaire Nietzsche Ruskin Pater W Ifflin and Riegl Each entry includes a critical essay a short biography a bibliography listing both primary and secondary texts Unique in its range and accessibly written this book together with its companion volume *Key Writers on Art The Twentieth Century* provides an invaluable guide for students as well as general readers with an interest in art history aesthetics and visual culture Insult and the Making of the Gay Self Didier

Eribon, 2004-07-07 Published in English for the first time Didier Eribon's well received and celebrated work on a philosophy of and examination of gay life *Winckelmann and the Notion of Aesthetic Education* Jeffrey Morrison, 1996 This work deals with the process of aesthetic education as defined by Winckelmann on the basis of his own experience of art and as applied to his teaching of two pupils A number of crucial difficulties are revealed not least because Winckelmann's teaching programme does little justice to his insights which were later appreciated and in some cases reproduced by Goethe *The Aphrodite of Knidos and Her Successors* Christine Mitchell Havelock, 2007 A revealing survey of Aphrodite *A New History of Western Art* Koenraad Jonckheere, 2022-10-15 A radical re examination of 2 500 years of European art deconstructing and demystifying its long history from ancient to present How has art evolved from the pursuit of the ideal human form to a black square on a white canvas Why is a banana duct taped to a wall worth more on the art market than a beautiful seventeenth century landscape By taking art for what it actually is a piece of stone or wood a sheet of paper with some lines drawn on it a painted canvas this lively and accessible account shows how seemingly meaningless objects can be transformed into celebrated works of art Breaking with conventional notions of artistic genius Koenraad Jonckheere explores how stories and emotions give meaning to objects and why changing historical circumstances result in such shifting opinions over time Tracing its story from ancient times to present *A New History of Western Art* reframes the evolution of European art and radically reshapes our understanding of art history Published in association with Hannibal Books **Art in the Social**

Order Preben Mortensen, 1997-03-20 *Art in the Social Order* makes a compelling case for the need to develop a properly historical approach to art Preben Mortensen seeks to replace the dominant approaches to the question of the nature of art in contemporary English speaking analytic philosophy with a historicist approach that emphasizes localized cultural historical narratives For the first time a historical examination of the origin of our ideas of art are related to questions in contemporary art theory Mortensen shows that our conception of art emerged in the eighteenth century as part of new ideas of edification and of the presentation of the self He examines the complex social and cultural context in which our ideas of art emerge in the eighteenth century In a context of social political and cultural changes knowledge about art and the display of taste come to indicate social distinctions and replace older notions of birth and rank Mortensen connects these historical developments

to contemporary discussions about the relationship between high art and popular art *Classical Culture and Modern Masculinity* Daniel Orrells, 2011-06-09 For nineteenth century thinkers in Germany and Britain who looked to Greece as the acme of past civilization the Greeks enjoyment of pederasty presented a problem Daniel Orrells s study explores the way in which this awkward issue was negotiated **Chroma: Sculpture in Color from Antiquity to Today** Seán

Hemingway, Vinzenz Brinkmann, Mark B. Abbe, 2025-06-30 Many ancient and early modern works that are viewed in monochrome today were once painted in vibrant colors Lost to time until recently the pigments and other surface treatments that originally adorned these objects offer a deeper appreciation of the cultures from which they originate This handsome volume features new research by more than thirty international experts in polychromy including art historians conservators scientists and photographers Identified through advanced technologies scientific analyses and in depth research their discoveries of surviving traces of color span the globe and vary in material including an Archaic Greek marble sphinx an ancient Phoenician cloisonné furniture plaque Mexica Aztec lime stone sculptures and medieval and Renaissance European marbles and bronzes This wide ranging publication explores how these works further our understanding of ancient ideas around skin color race and gender summarizes recent advances in the field and considers polychromy s controversial rediscovery and modern reception highlighting the role of reconstructions such as 3D printed replicas and virtual animations in contemporary museum practice as well as the resurgence of polychromy techniques in postmodern and contemporary European architecture **Victorian Ethical Optics** Natalie Prizel, 2024-05-16 Explores the way that characters and figures in Victorian literature and visual art encountered and observed the bodies of others particularly those bodies which were aberrant deformed and disabled *Diotima's Children* Frederick C. Beiser, 2009-10-29 Diotima s Children is a re examination of the rationalist tradition of aesthetics which prevailed in Germany in the late seventeenth and eighteenth century It is partly an historical survey of the central figures and themes of this tradition But it is also a philosophical defense of some of its leading ideas viz that beauty plays an integral role in life that aesthetic pleasure is the perception of perfection that aesthetic rules are inevitable and valuable It shows that the criticisms of Kant and Nietzsche of this tradition are largely unfounded The rationalist tradition deserves re examination because it is of great historical significance marking the beginning of modern aesthetics art criticism and art history
