

From The Air

Chandra D. Bhimull

From The Air:

Prehistoric Britain from the Air Timothy Darvill, 1996-07-04 This book provides a bird's eye look at the monumental achievements of Britain's earliest inhabitants. Arranged thematically, it illustrates and describes a wide selection of archaeological sites and landscapes dating from between 500,000 years ago and the Roman conquest. Timothy Darvill brings to life many of the familiar sites and monuments that prehistoric communities built and exposes to view many thousands of sites that simply cannot be seen at ground level. Throughout the book, he makes a unique application of social archaeology to the field of aerial photography.

Castles from the Air R. Allen Brown, 1989-07-28 Uses the aerial photography to reveal the medieval castles of Britain in their landscape setting.

Empire in the Air Chandra D. Bhimull, 2017-12-12 Honorable Mention 2019 Victor Turner Prize in Ethnographic Writing given by the Society for Humanistic Anthropology. Honorable Mention 2019 Sharon Stephens Prize given by the American Ethnological Society. Examines the role that race played in the inception of the airline industry. *Empire in the Air* is at once a history of aviation and an examination of how air travel changed lives along the transatlantic corridor of the African diaspora. Focusing on Britain and its Caribbean colonies, Chandra Bhimull reveals how the black West Indies shaped the development of British Airways. Bhimull offers a unique analysis of early airline travel, illuminating the links among empire, aviation, and diaspora, and in doing so, provides insights into how racially oppressed people experienced air travel. The emergence of artificial flight revolutionized the movement of people and power, and Bhimull makes the connection between airplanes and the other vessels that have helped make and maintain the African diaspora: the slave ships of the Middle Passage, the tracks of the Underground Railroad, and Marcus Garvey's black-owned ocean liner. As a new technology, airline travel retained the racist ideas and practices that were embedded in British imperialism, and these ideas shaped every aspect of how commercial aviation developed from how airline routes were set to who could travel easily and who could not. The author concludes with a look at airline travel today, suggesting that racism is still enmeshed in the banalities of contemporary flight.

The Air Reservist, 1982

Leviathan and the Air-Pump Steven Shapin, Simon Schaffer, 2011-09-04 *Leviathan and the Air Pump* examines the conflicts over the value and propriety of experimental methods between two major seventeenth-century thinkers: Thomas Hobbes, author of the political treatise *Leviathan*, and vehement critic of systematic experimentation in natural philosophy; and Robert Boyle, mechanical philosopher and owner of the newly invented air pump. The issues at stake in their disputes ranged from the physical integrity of the air pump to the intellectual integrity of the knowledge it might yield. Both Boyle and Hobbes were looking for ways of establishing knowledge that did not decay into ad hominem attacks and political division. Boyle proposed the experiment as a cure. He argued that facts should be manufactured by machines like the air pump so that gentlemen could witness the experiments and produce knowledge that everyone agreed on. Hobbes, by contrast, looked for natural law and viewed experiments as the artificial, unreliable products of an exclusive guild. The new approaches taken in *Leviathan and the Air*

Pump have been enormously influential on historical studies of science Shapin and Schaffer found a moment of scientific revolution and showed how key scientific givens facts interpretations experiment truth were fundamental to a new political order Shapin and Schaffer were also innovative in their ethnographic approach Attempting to understand the work habits rituals and social structures of a remote unfamiliar group they argued that politics were tied up in what scientists did rather than what they said Steven Shapin and Simon Schaffer use the confrontation between Hobbes and Boyle as a way of understanding what was at stake in the early history of scientific experimentation They describe the protagonists divergent views of natural knowledge and situate the Hobbes Boyle disputes within contemporary debates over the role of intellectuals in public life and the problems of social order and assent in Restoration England In a new introduction the authors describe how science and its social context were understood when this book was first published and how the study of the history of science has changed since then
