Facing the Sea of Sand Barry Cunliffe, 2023 Northern Africa is dominated by the Sahara Desert stretching across the continent from the Atlantic Ocean to the Red Sea This book is about the people who lived around the edges of the Desert and the different ways in which they responded to its challenges establishing networks of communication across its expanse But the Sahara has not always been a desert From about 9000 BC the region began to enjoy a warm humid period allowing vegetation to flourish and wild animals to move in Humans soon followed practising pastoral economies but with the onset of harsher conditions once more around 3000 BC the desert reclaimed its own Since then fluctuations in climate have

continued to affect the lives of people living around the desert fringes The communities occupying the North African Coast and in the Nile Valley have come under the influence of the states dominating the Near East and the Mediterranean but those living in in the Sahel to the south of the desert have developed their own distinctive cultures The book tells the story of the growing links between the two worlds showing that Africa played a crucial part in the development of the Old World before it was drawn into the story of the New World
