Orleans Hurricanes from the Start David Bastian, Nicholas J. Meis, 2014-05-15 An encyclopedic history of the Crescent City's most violent storms with analysis, predictions, and suggestions for the future. According to the US Army Corps of Engineers, the city of New Orleans is twice as likely to be struck by a hurricane as any other metropolitan area bordering the Gulf of Mexico. In this work, authors David F. Bastian and Nicholas J. Meis explore the historical records of storms that have affected the region in and around south Louisiana since the first colonizers set foot on the Mississippi delta in the late seventeenth century. Using letters, personal diaries, official records, newspaper articles, and expert analyses, Bastian and Meis delve into the effects of the monstrous storms that have irreparably impacted south Louisiana, including what went awry during Katrina in 2005. Also examined is the evolution of New Orleans's protection systems as well as what the city can do to avoid another catastrophe.

Montessori from the Start Paula Polk Lillard, Lynn Lillard Jessen, 2008-12-18 Based on Dr. Maria Montessori's philosophies for nurturing babies and toddlers, this practical and useful guide is brimming with instructions, anecdotes, and encouragement for raising calm, competent, and confident children. From designing the baby's bedroom to encouraging life skills such as dressing themselves and working both independently and collaboratively, what can parents do to help their youngest children in their task of self-formation? How does the Montessori method of hands-on learning and self-discovery relate to newborns, infants, and toddlers? This authoritative and accessible book answers these and many other questions. Its comprehensive exploration of the first three years incorporates the furnishings and tools Dr. Montessori created for the care and comfort of babies. From the design of the baby's bedroom to the child-sized kitchen table, from food preparation to clothing and movement, the authors provide guidance for the establishment of a beautiful and serviceable environment for babies and very young children. They also introduce concepts and tasks taking into account children's sensitive periods for learning such skills as toilet training. Written in a clear, engaging style, *Montessori from the Start* is a must-have for every new parent.

Charlotte Brontë from the Beginnings Judith E. Pike, Lucy Morrison, 2016-09-19 Composed of serialized works, poems, short tales, and novellas, Charlotte Brontë's juvenilia merit serious scholarly attention as revelatory works in and of themselves as well as for what they tell us about the development of Brontë as a writer. This timely collection attends to both critical strands, positioning Brontë as an author whose career encompassed the Romantic and Victorian eras and delving

into the developing nineteenth century's literary concerns as well as the growth of the writer's mind. As the contributors show, Brontë's authorship took shape among the pages of her juvenilia as figures from Brontë's childhood experience of the world such as Wellington and Napoleon transmuted to her fictional pages while her siblings' works and worlds both overlapped with and extended beyond her own.

Light from the East Alexei V. Nesteruk, In this unique volume a new and distinctive perspective on hotly debated issues in science and religion emerges from the unlikely ancient Eastern Orthodox Christian tradition. Alexei Nesteruk reveals how the Orthodox tradition, deeply rooted in Greek Patristic thought, can contribute importantly in a way that the usual Western sources do not. Orthodox thought, he holds, profoundly and helpfully relates the experience of God to our knowledge of the world. His masterful historical introduction to the Orthodox traditions not only surveys key features of its theology but highlights its ontology of participation and communion. From this Nesteruk derives Orthodoxy's unique approach to theological and scientific attribution. Theology identifies the underlying principles (*logoi*) in scientific affirmations. Nesteruk then applies this methodology to key issues in cosmology: the presence of the divine in creation, the theological meaning of models of creation, the problem of time, and the validity of the anthropic principle, especially as it relates to the emergence of humans and the Incarnation. Nesteruk's unique synthesis is not a valorization of Eastern Orthodox thought so much as an influx of startlingly fresh ideas about the character of science itself and an affirmation of the ultimate religious and theological value of the whole scientific enterprise.
