

The background of the book cover is a detailed illustration of a lunar landscape. In the foreground, a large, multi-stage rocket ship is shown ascending from the surface, angled towards the upper right. The surface is covered in craters and rocks. In the upper left, a bright, curved horizon line suggests the Earth as seen from the Moon. A comet with a long tail is visible in the lower left sky area. The overall tone is dark and atmospheric.

From the Earth to the Moon and Round the Moon Jules Verne, 2021-06-23 Jules Verne's classic science fiction adventure of mankind's first trip to the Moon. The Civil War was over, the Gun Club was finished. What if they changed history? When Barbicane had the idea to repurpose weapons of war for science, his friends laughed at him. His rival Captain Nicholl ridiculed him for his ideas. But he didn't let it deter him. Would they be ready in time? Philosophers had dreamed of setting foot on the Moon for thousands of years. Would the Gun Club have what it takes to man the first mission? Or would technology prove too limited? What dangers awaited them in space? Barbicane's infectious enthusiasm inspired enemies and adventurers across the world. Would it be enough to get him and his friends safely back to Earth? Would they let their differences divide or unite them?

It tells the story of the Baltimore Gun Club, a post-American Civil War society of weapons enthusiasts and their attempts to build an enormous Columbiad space gun and launch three people. (Annotated) Jules Verne, 2011-08-19 *From the Earth to the Moon* French: *De la Terre la Lune* 1865 is a humorous science fantasy novel by Jules Verne and is one of the earliest entries in that genre. It tells the story of the president of a post-American Civil War gun club in Baltimore, his rival, a Philadelphia maker of armor, and a Frenchman who builds an enormous sky-facing Columbiad space gun and launch themselves in a projectile spaceship from it to a Moon landing. The story is also notable in that Verne attempted to do some rough calculations as to the requirements for the cannon and considering the comparative lack of any data on the subject at the time, some of his figures are surprisingly close to reality. However, his scenario turned out to be impractical for safe manned space travel since a much longer muzzle would have been required to reach escape velocity while limiting acceleration to survivable limits for the passengers. Includes a Biography of the Author.

Smyth, 2000-02-02 Although critics continue to debate whether Jules Verne's work is true science fiction SF rather than

scientific romance Verne is widely credited as one of the founders of the genre and in the popular imagination he and SF are seen as largely synonymous Verne has received renewed attention since the publication in 1994 of his *Paris au Vingtieme Siecle* and this has highlighted his importance as a key commentator on the anguishes of modernity Arthur B Evans provides a detailed account of the relationship between Verne and the French literary canon demonstrating the now ineluctable trend towards rehabilitation and literary canonization Daniel Compere examines narrative technique verisimilitude defamiliarization naturalization and dialogism in Verne's work while Timothy Unwin develops the enquiry into the nature of the Vernian text in discussing the role of science and textual repetition The interface between realism utopianism and SF in a number of Verne's novels is investigated by Sarah Capitano
