Food Aid In The Developing World:

Food Aid and the Developing World Christopher Stevens, 2010-11-29 Food aid is a controversial form of development assistance and this book first published in 1979 seeks to counter allegations from critics by taking account of both direct and indirect affects Based on field research in Tunisia Botswana Upper Volta and Lesotho it considers aid from the UK EEC USAID the World Food Programme Canada and France and draws a number of policy orientated conclusions about the impact of food aid on nutrition consumer prices and agricultural production In the light of the evidence from field studies it is shown that many of the claims advanced by food aid supporters and by critics cannot be sustained and that the real impact of food aid is rather different from that assumed by the conventional wisdom on the subject *Food Aid Reconsidered* Edward Clay, Olav Stokke, 2025-06-20 Food aid continues to be a high profile and perhaps the most controversial form of aid Food Aid Reconsidered Assessing the Impact on Third World Countries originally published in 1991 which concentrates on recent experience especially in Sub Saharan Africa provided a stocktaking on the state of the debate and the contribution that economics and other social sciences had made to resolving many of the controversies surrounding food aid at the time These issues include the gap between the potential and actual contribution of food aid on food security and agricultural production in developing countries European dairy aid to India and possible alternatives to exporting food from developed countries for providing humanitarian assistance to hungry people Today it can be read in its historical context Food Aid Programs United States. corporations and economic coalitions and based on unequal power arrangements While rooted in ideas about progress and prosperity development also produces crises that threaten the health and well being of millions of people and sparks organized resistance to its goals and policies Frequent case studies make the intricacies of globalization concrete meaningful and clear Development and Social Change A Global Perspective challenges us to see ourselves as global citizens even as we are global consumers

Hunger in the Balance Jennifer Clapp,2015-10-27

Food aid has become a contentious issue in recent decades with sharp disagreements over genetically modified crops agricultural subsidies and ways of guaranteeing food security in the face of successive global food crises In *Hunger in the Balance* Jennifer Clapp provides a timely and comprehensive account of the contemporary politics of food aid explaining the origins and outcomes of recent clashes between donor nations and between donors and recipients She identifies fundamental disputes between donors over tied food aid which requires that food be sourced in the donor country versus untied aid which provides cash to purchase food closer to the source of hunger These debates have been especially intense between the major food aid donors particularly the European Union and the United States Similarly the EU s rejection of GMO agricultural imports has raised concerns among recipients about accepting GMO foodstuffs from the United States For the several hundred million people who at present have little choice but to rely on food aid for their daily survival Clapp concludes the consequences of these political differences are profound
