Clarke, 2011-11-30 *Wine Flavour Chemistry* brings together a vast wealth of information describing components of wine their underlying chemistry and their possible role in the taste smell and overall perception It includes both table wines and fortified wines such as Sherry Port and the newly added Madeira as well as other special wines This fully revised and updated edition includes new information also on retsina wines ros s organic and reduced alcohol wines and has been expanded with coverage of the latest research Both EU and non EU countries are referred to making this book a truly global reference for academics and enologists worldwide *Wine Flavour Chemistry* is essential reading for all those involved in commercial wine making whether in production trade or research The book is of great use and interest to all enologists and to food and beverage scientists and technologists working in commerce and academia Upper level students and teachers on enology courses will need to read this book wherever food and beverage science technology and chemistry are taught libraries should have multiple copies of this important book

Food and Health: Science and Technology G. G. Birch, K. J. Parker, 2012-12-06 *The Control and Standardisation of National Food Quality* There must be very many different opinions as to what this title means To some people it will mean the control by legislation of additive and contaminant levels in food to others it may mean the laying down of compositional standards for different food commodities yet again some may consider that it covers the nutritional quality of the food and the maintenance of an adequate satisfactory diet for the population of the country I think certainly that it could be all of these things and a glance at the variety of titles of papers which other speakers will be giving later in this symposium illustrates the very wide area which is covered by food quality in its many aspects I will try only to present to you some of those aspects which are the concern of government in the control of food quality I will not concern myself with those aspects which are the concern only of the manufacturer and his customer and here I am thinking of flavour appearance and physical state such as whether canned fresh or frozen These aspects which affect the type of products to be marketed and also the aspects of quality control which set out to maintain the standard that the manufacturer has set himself are I think outside my province
