Graf, I. Saguy, 1990-12-15 Numerous textbooks treat various aspects of food chemistry and engineering yet little information is available on the process of industrial food research and development Currently no textbooks of academic courses cover the broad area of product development This void keeps even the most qualified person from reaching an informed decision about a career in this field This book is intended to introduce the food industry novice to the diverse facets of the profession and to serve as a useful monograph for the expert by portraying the wide scope of R D in an industry that is market driven and highly vulnerable to demographic fluctuations Food industry experts from diverse disciplines provide a broad overview of the numerous aspects of successful food research and development from consumer trend analysis to commercialization The book also highlights some of the activities and skill requirements that are unique to an industrial food research career We wish to express our sincere gratitude to all of the book's contributors who have made its publication possible **New Food Product Development** Gordon W. Fuller, 2004 This new edition of a best selling text in food product development provides a comprehensive overview of the new food product development process Stages of development are described in detail

beginning with sources of ideas then moving through development final screening and introduction into the marketplace With extensive experience in new food product development the author outlines ways a company can organize for new product development and utilize available resources He focuses on the roles functions and interactions of the members of the food product development team as well as other company departments and outside resources in the food product development process Provided by publisher

New Food Product Development Gordon W. Fuller,1994-02-23 This book provides an objective overview of the hectic often chaotic and frequently unpredictable new food product development process The stages of development are described from the vantage points of the technologist marketer and senior management by an author who has worn all three hats The book covers the various stages of product development including generating and sifting ideas against the company s objectives the consumers perceived needs and expectations the competitiveness of the marketplace the technologist s ability to create and manufacture a safe product within budget and test marketing Problems facing both small and large companies are confronted and solutions are proposed Test marketing and the evaluation of such tests are discussed with some new suggestions for interpreting the criteria used A chapter on organization presents ideas for fostering creativity and avoiding communication and personality conflicts Trends in new ingredients and technologies to assist in the design of new products are given full coverage The last chapter is devoted to the future with stimulating discussion of new challenges to current trends in the industry

Developing New Food Products for a Changing Marketplace Aaron L. Brody,John B. Lord,2007-11-05 Written by world class authorities this volume discusses formulation sensory and consumer testing package design commercial production and product launch and marketing Offering the same caliber of information that made the widely adopted first edition so popular the second edition introduces new concepts in staffing identifying and measuring consumer desires engineering scale up from the kitchen lab or pilot plant and generating product concepts Applying insights from real life experience contributors probe the retail environment covering optimization sensory analysis package design and the increasingly important role of the research chef or culinologist in providing the basic recipe

An Integrated Approach to New Food Product Development Howard R. Moskowitz,I. Sam Saguy,Tim Straus,2009-06-24 Today s rapidly evolving consumer frequently changes eating habits tastes and diet Therefore to secure financial solvency food and beverage companies must continually define develop and market new products This comprehensive volume integrates all aspects of the physical food and beverage product development cycle and provides perspectives on how to optimize each component of the new product equation in the food industry It discusses both the technical and the marketing sides emphasizing the necessity for a combined focus of both the product process and the people market The inclusion of case studies makes the book suitable for a classroom text or a professional reference

Case Studies in Food Product Development M Earle,R Earle,2007-12-18 New product development is vital for the future of the food industry Many books have been written on NPD theory over the last 40 years but much can still be learnt by

studying actual experiences of NPD Case studies in food product development describes specific NPD projects in a variety of industries internationally and also records overall comments written by the very people who have completed the projects Part one outlines new product development in the food industry and part two views product development strategy and management in different companies and organisations Parts three four and five are twelve case studies on respectively the product development process technological development consumer and market research Part six considers product development in practice and the final chapter demonstrates how product developers are being educated The case studies are written by experienced product developers talking openly about experiences with their own products It is hoped that those faced with similar challenges will gain from these real life experiences Mary and Dick are also co authors with Allan Anderson of Food product development which has achieved international success Case studies in food product development is a complement and a practical companion to this book Describes new product development in a variety of international industries Outlines new product development in the food industry and views product management and strategy in different organisations Includes case studies focusing on the product development process technological development and consumer and market research

Concept Research in Food Product Design and Development Howard R. Moskowitz, Sebastiano Porretta, Matthias Silcher, 2008-02-28 Concepts are critical for the development and marketing of products and services They constitute the blueprint for these products and services albeit at the level of consumers rather than at the technical level A good product concept can help make the product a success by guiding developers and advertising in the right direction Yet there is a dearth of both practical and scientific information about how to create and evaluate concepts There has been little or no focus on establishing knowledge bases for concepts Concept development is too often relegated to the so called fuzzy front end Concept Research in Food Product Design and Development remedies this inattention to product concepts by providing a unique treatment of concepts for the business professional as well as for research scientists The book begins with simple principles of concepts moves forward to methods for testing concepts and then on to more substantive areas such as establishing validity testing internationally and with children creating databases and selling in new methods for concept testing The book combines a how to business book with a detailed treatment of the different facets of concept research As such the book represents a unique contribution to business applications in food and consumer research methods The book is positioned specifically for foods to maintain a focus on a coherent set of topics Concept Research in Food Product Design and Development appeals to a wide variety of audiences R D marketing sensory analysts and universities alike Corporate R D professionals will learn how to create strong concepts Marketers will recognize how concepts are at the heart of their business Sensory analysts will find the book a natural extension of their interest in product features University students will understand how concept research is a critical part of the consumer connection Concept Research in Food Product Design and Development is the definitive innovative text in describing how to create analyze and capitalize upon new product concepts
