Food Paul Freedman, 2007 This richly illustrated book applies the discoveries of the new generation of food historians to the pleasures of dining and the culinary accomplishments of diverse civilizations past and present Freedman gathers essays by French German Belgian American and British historians to present a comprehensive chronological history of taste Oxford Handbook of Food History Jeffrey M. Pilcher, 2012-10-16 Food matters not only as a subject of study in its own right but also as a medium for conveying critical messages about capitalism the environment and social inequality to diverse audiences Recent scholarship on the subject draws from both a pathbreaking body of secondary literature and an inexhaustible wealth of primary sources from ancient Chinese philosophical tracts to McDonald's menus contributing new perspectives to the historical study of food culture and society and challenging the limits of history itself The Oxford Handbook of Food History places existing works in historiographical context crossing disciplinary chronological and geographic boundaries while also suggesting new routes for future research. The twenty seven essays in this book are organized into five sections historiography disciplinary approaches production circulation and consumption of food The first two sections examine the foundations of food history not only in relation to key developments in the discipline of history itself such as the French Annales school and the cultural turn but also in anthropology sociology geography pedagogy and the emerging Critical Nutrition Studies The following three sections sketch various trajectories of food as it travels from farm to table factory to eatery nature to society Each section balances material cultural and intellectual concerns whether juxtaposing questions of agriculture and the environment with the notion of cookbooks as historical documents early human migrations with modern culinary tourism or religious customs with social activism In its vast interdisciplinary scope this handbook brings students and scholars an authoritative guide to a field with fresh insights into one of the most fundamental human concerns Food History Almanac: Over 1,300 Years of World Culinary History, Culture, and Social Influence Janet Clarkson, 2013-12-24 The Food History Almanac covers 365 days of the year with information and anecdotes relating to food history from around the world from medieval times to the present The daily entries include such topics as celebrations significant food related moments in history from the fields of science and technology exploration and discovery travel literature hotel and restaurant history and military history menus from famous and infamous meals across a wide spectrum from extravagant royal banquets to war rations and prison fare birthdays of important people in the food field and publication dates for important cookbooks and food texts and first known recipes Food historian Janet Clarkson has drawn from her vast compendium of historical cookbooks food texts scholarly articles journals diaries ships logs letters official reports and newspaper and magazine articles to bring food history alive History buffs foodies students doing reports and curious readers will find it a constant delight An introduction list of recipes selected bibliography and set index plus a number of period illustrations are added value Food J. Atkins, 2021-05-17 This pioneering book elevates the senses to a central role in the study of food history because the traditional focus upon food types quantities and nutritional values is incomplete without some recognition of smell touch sight hearing and taste Eating is a sensual experience Every day and at every meal the senses of smell touch sight hearing and taste are engaged in the acts of preparation and consumption And yet these bodily acts are ephemeral their imprint upon the source material of history is vestigial Hitherto historians have shown little interest in the senses beyond taste and this book fills that research gap Four dimensions are treated Words Symbols and Uses Describing the Senses an investigation of how specific vocabularies for food are developed Industrializing the Senses an analysis of the fundamental change in the sensory qualities of foods under the pressure of industrialization and economic forces outside the control of the household and the artisan producer Nationhood and the Senses an exploration of how the combination of the senses and food play into how nations saw themselves and how food was a signature of how political ideologies played out in practical everyday terms Food Senses and Globalization an examination of links between food the senses and the idea of international significance Putting all of the senses on the agenda of food history for the first time this is the ideal volume for scholars of food history food studies and food culture as well as social and cultural historians Putting all of the senses on the agenda of food history for the first time this is the ideal volume for scholars of food history food studies and food culture as well as social and cultural historians Eating History Andrew F.
