Compendium of the Microbiological Spoilage of Foods and Beverages William H. Sperber, Michael P. Doyle, 2009-09-23 The increased emphasis on food safety during the past two decades has decreased the emphasis on the loss of food through spoilage particularly in developed co tries where food is more abundant In these countries spoilage is a commercial issue that affects the pro t or loss of producers and manufacturers In lesser developed countries spoilage continues to be a major concern The amount of food lost to spoilage is not known As will be evident in this text stability and the type of spoilage are in uenced by the inherent properties of the food and many other factors During the Second World War a major effort was given to developing the te nologies needed to ship foods to different regions of the world without spoilage The food was essential to the military and to populations in countries that could not provide for themselves Since then progress has been made in improved product formulations processing packaging and distribution systems New products have continued to evolve but for many new perishable foods product stability continues to be a limiting factor Many new products have failed to reach the marketplace because of spoilage issues **Alternative Sweeteners, Fourth Edition** Lyn O'Brien-Nabors, 2011-09-06 Sweeteners are forever in the news Whether it s information about a new sweetener or questions about one that has been on the market for years interest in sweeteners and sweetness continues Completely revised and updated this fourth edition of Alternative Sweeteners provides information on new recently evaluated and numerous other alternatives to sucrose This edition retains the successful format that made previous editions so popular The discussion of each sweetener includes production physical characteristics utility and relative sweetness compared to sucrose technical qualities admixture potential application availability shelf life general cost and economics metabolism carcinogenicity and other toxicity evaluation data cariogenicity evaluations and regulatory status Scientists and food technologists have been researching sweeteners and sweetness for more than 100 years.
