**The Food Traveler's Handbook** Jodi Ettenberg, 2012-09 Part of the Traveler's Handbook series The Food Traveler's Handbook provides a compelling argument for why it is important to use food as a lens through which you see the world Using this handbook as a guide you will learn how to eat safely in developing countries source cheap but delicious streetside meals and discover how to make food a tool for understanding a new place and connecting to its local culture *Destination Branding* Nigel Morgan, Annette Pritchard, Roger Pride, 2007-06-07 In today's highly competitive market many destinations from individual resorts to countries are adopting branding techniques similar to those used by Coca Cola Nike and Sony in an effort to differentiate their identities and to emphasize the uniqueness of their product By focusing on a range of global case studies Destination Branding demonstrates that the adoption of a highly targeted consumer research based multi agency mood branding initiative leads to success every time *Market Place* Susan Parham, 2013-02-21 This book is about designing for food It explores three fast transforming urban sites in London centred on the regenerating spaces of Borough Broadway and Exmouth Markets It suggests that food quarters have emerged in each place modelling new forms of interconnection between physical design and social processes in which food related renewal is at the heart Using case study research informed by design morphological and social science techniques the book explores how the interplay between compact city design and social practices focused on food strongly influences the making of everyday life in these places It demonstrates that the quarters have at once enriched the experience of food and eating and increased urban sustainability and conviviality in and around previously moribund food spaces while paradoxically contributing to gentrification effects The book frames this experience within more spatially dominant approaches to city design which seem to close off convivial food options and choices that would support a more satisfying and resilient urban life The book draws some conclusions about the complexities of designing and planning for food led renewal that might apply more broadly to other places in London and potentially to other cities in future
