Redesigning Ireland's Transport for Net Zero Towards Systems that Work for People and the Planet OECD,2022-10-05

Current mobility patterns in Ireland are incompatible with the country's target to halve emissions in the transport sector by 2030. Footprints Kai Fang,2020-10-19 This book focuses on environmental footprints that have attracted considerable interest and discussion within academia, policy makers and the public as a tool to assess anthropogenic effects on the environment. It begins with an overview which provides a starting point for understanding the concept of environmental footprints. On the basis of a thorough investigation into the theoretical and methodological aspects of selected environmental footprints that have been widely adopted, a unified framework for structuring, categorizing and integrating various footprint indicators is established. Furthermore, the book brings clarity to the relationship between footprint analysis and life cycle assessment and challenges the isolation of environmental footprints and planetary boundaries. The findings provide novel insights into the development of environmental footprints for environmental impact assessment and environmental sustainability assessment.

Export Product Quality, Renewable Energy, and Sustainable Production

Umer Shahzad, Gagan Deep Sharma, Lianbiao Cui, John Mendy, 2023-09-12 Economic development has long been acknowledged for its beneficial effects on human well being. In the context of economic globalization and vertical specialization, increasing the quality of export products is more critical and necessary to export success and sustainable development. The product's quality is inextricably linked to its manufacture and production, which need various types of energy and raw materials. Meanwhile, the adoption of more environmentally friendly and cleaner energy sources contributes to the achievement of sustainable production. Therefore, product quality may provide a new perspective from which to investigate the systematic relationship between greener and renewable energy sources, sustainable production, and environmental regulations, as well as the nature of export competitiveness. Generally, export product quality has referred to the quality of manufactured products within the product lines. Quality refers to the relative price of a country's varieties within their respective product lines. Product sophistication assesses the composition of the aggregate exports. Different varieties of same product at per quality level are being produced by several developing and emerging economies. Within any given product line, quality converges both conditionally and unconditionally to the world's benchmark. Increases in institutional quality and human capital are associated with faster quality upgrading. In turn, faster growth in quality is associated with more rapid output growth. *Small States of the European Union and Brexit* Laura C.

Ferreira-Pereira, 2024-06-28 This book seeks to offer a better understanding of the strategic responses to Brexit from ten small European Union (EU) member states: Croatia, Czech Republic, Estonia, Finland, Ireland, Latvia, Lithuania, Malta, Portugal, and Slovakia. Inspired in an intersection of different streams of research, it examines the extent and the ways Brexit has impacted these countries, analysing their coping strategies to deal with the challenges raised by such a disruptive development, as well as considering the implications of their reactions to Brexit for patterns of national foreign policy. Europeanization. In so doing, this volume enhances the comprehension of smaller EU member states' foreign and security policies, offering a systematic and comparative analysis of how political and diplomatic elites in ten countries positioned themselves domestically and within the EU vis-à-vis the Brexit process. A combination of conceptual insights, valuable empirical accounts, and updated knowledge on contemporary issues from such an interesting set of case studies provides room for debate on the comparability of the ways in which different small countries have approached their Brexit strategies. All these aspects are explored with respect to states that have been relatively neglected and underexplored in the small states literature. This edited volume will be of great value to upper level students, academics, and researchers interested in European politics, foreign policy, and international relations. The chapters in this book were originally published as a special issue of *Journal of Contemporary European Studies*.
