Time and Place in Deuteronomy James Gordon McConville, J. G. Millar, 1995-01-01 The book is a literary and theological study of the themes of time and place which aims to set the so called centralization law of Deut 12 26 in the broad context of the book The authors show that time and place are pervasive themes of Deuteronomy a crucial part of its articulation of its understanding of history religion and ethics The heart of the thesis is that the foundational encounter between God and Israel at Horeb is paradigmatic for all subsequent encounters For this reason no one time or place can have final or absolute significance The thesis thus calls into question the received view that the altar law of Deut 12 26 is a centralization law associated with Josiah s reform The refusal to identify the place is no mere device against anachronism but a consistent element in Deuteronomy s theology of history The Connection between Deuteronomy and Josiah s reform has long been an important tenet of Old Testament criticism The debate about the interpretation of Deuteronomy however has never been finally settled The present study looks in a new way at the so called centralization law of Deuteronomy which has been the most important factor in the traditional critical view of the book It sets the law in the context of a broadly based study of the

theology of the book and comes to conclusions which call the connection with Josiah's reform into question. A broadly based study of the themes of time and place in Deuteronomy calling into question accepted ideas about the purpose and setting of the book.

Geography of Time, Place, Movement and Networks, Volume 2 Stanley D. Brunn, 2024-05-23 This book explores journeys in a time context with a focus on places, place meanings and landscapes. Whether the journey relates to ancient or modern trails, roads or railroads or a historical or contemporary pilgrimage or a tourist venture in social contexts, the book addresses the importance of places and environmental settings whereby time itself is described and defined in multiple contexts. The chapters discuss among others archaeological and pre-history settings, tourism settings and heritage events as well as regional and transnational migration routes and those used by historical nomadic cultures and postmodern nomads. Some time and place journeys are fluid and dynamic and re-interpreted while for others there is much sameness in the visible landscapes. Retaining the past and reconstructing the past are both journeys. That sameness concept is also applied to cultural and political worlds where there is little progress or reform to address social welfare and empowerment. This book opens the door for exploring shallow and deep journeys by those in the humanities and social sciences at local, national and regional scales.

Geography of Time, Place, Movement and Networks, Volume 4 Stanley D. Brunn, 2024-05-23 This book provides insight into the importance of place and place settings in personal journeys. It explores the worlds of time journeys in different contexts: daily work, community, livelihoods, rural, urban, migration, disease outbreaks and controls, cruise ship tours and isolated frontier settings. Besides this, the book also addresses the networks connecting rural and urban places, transcontinental highways and railroads, rural urban migration and other innovative journeys such as gas station, road maps and body maps. The chapters also discuss how eradicating diseases are time-place journeys as is moving from a distant isolated frontier to a metropolis. As such, this book is a must-read for those interested in exploring the intersections in and between the humanities and social policy sciences.
