**Mapping Policy Preferences from Texts** Andrea Volkens, Judith Bara, Ian Budge, Michael D. McDonald, Hans-Dieter Klingemann, 2013-11-28 The Manifesto data are the only comprehensive set of policy indicators for social economic and political research It is thus vital that their quality is established The purpose of this book is to review methodological issues that have got in the way of straightforwardly using the Manifesto data since our two preceding volumes were published and to resolve them in ways which best serve users and textual analysts in general The book is thus generally about text based quantitative analysis with a particular focus on the quality of the CMP MARPOR data and ways of assessing and using them In doing so the book goes beyond normal data documentation essential though that is to confront the analytic issues faced by users of the data now distributed by MARPOR It also provides concrete strategies for tackling these at the research level with examples from the field of political representation The problems of uncertainty error reliability and validity considered here are generic issues for political analysts in any area of research so the book has an interest extending beyond the Manifesto estimates themselves in particular to other textual analyses In addition the book widens the range of applications introduced in our two previous volumes and discusses the extension of the manifesto project database to cover Latin America

**Annual Review of the Sociology of Religion. Volume 3 (2012)**, 2012-08-24 This volume points to methodological innovations in social research and their potential for social scientific studies of religion Computerization has opened for both quantitative and qualitative systematic analyses of complex materials and the epistemological discourse after Positivism has opened for reconsidering the foundation of empirical social research Furthermore religion is changing and sociology of religion therefore widens its scope by including non institutional forms of religion This refocusing calls for new methodological considerations As the range of available methods expands it becomes more pressing to consider whether and how methods can be combined such as quantitative and qualitative methods Studying religion as a complex social phenomenon calls for a variety of methods but an integration of the empirical findings points back to the epistemological issue

Latin American Social Movements Hank Johnston, Paul Almeida, 2006 The two current trends of democratization and deepening economic liberalization have made Latin American countries a ground for massive defensive mobilization campaigns and have created new sites of popular struggle In this edited volume on Latin American social movements original chapters are combined with peer reviewed
