European architects understood the client's instrumental role in giving form and meaning to architectural space. In a treatise published in 1745 the French architect Germain Boffrand determined that a visitor could judge the character of the master for whom the house was built by the way in which it is planned, decorated and distributed. This interdisciplinary volume addresses two key interests of contemporary historians working in a range of disciplines: one, the broad question of identity formation, most notably as it relates to ideas of gender, class and ethnicity; and two, the role played by different spatial environments in the production, not merely the reflection, of identity at defining historical and cultural moments. By combining contemporary critical analysis with a historically specific approach, the book's contributors situate ideas of space and the self within the visual and material remains of interiors in eighteenth-century Europe. In doing so, they offer compelling new insight not only into this historical period but also into our own. Historic Preservation Arnold L. Markowitz, 1980

Northumbria Robert Colls, 2019-02-26 The North East is probably England's most distinctive region. A place of strong character with a very special sense of its past, it is, as William Hutchinson remarked in 1778, 'truly historical ground'. This is a book about both the ancient Anglian kingdom of Northumbria, which stretched from the Humber to the Scottish border, and the ways in which the idea of being a Northumbrian, or a northerner, or someone from the North East, persisted in the area long after the early English kingdom had fallen. It examines not only the history of the region but also the successive waves of identity that that history has bestowed over a very long period of time. Successful nations write about themselves in these terms, so why not regions? Northumbria existed before England began, but is still with us in name and in the way we think about ourselves. A series of sections entitled 'Christian Kingdom', 'Borderland' and 'Coalfield New Northumbria Cultural Region' and 'Northumbrian Island' explore the region on the grand scale, from the very beginning, and bring a sharp sense of history to bear on the various threads that have influenced the making of modern regional identity. The book is a work of exceptional scholarship. Never before have so many acclaimed historians addressed together the issues which have affected this special region. Clearly written and rich in ideas, chapters explore the physical origins of Northumbria and consider just how the pressing political and military claims of adjoining states shaped and tempered it. There are further chapters on art, music, mythology, dialect, history, economy, poetry, politics, religion, antiquarianism, literature and settlement. They show how Northumbrians have lived and died, and looked forward and back, and these accounts of the North East's past will surely help in the shaping of its future. *A Short History of British Architecture* Simon Jenkins, 2024-11-07 Provocative, elegant, intriguing, Jenkins is a bold, imaginative writer, brilliant at challenging old assumptions and encouraging you to look at British architecture in a new light. Rory Stewart: 'The story of Britain is revealed through its buildings, and yet the language of architecture is a mystery to all but a few. In this enlightening history, spanning castles and cathedrals to factories and railway stations, Jenkins translates the hidden narratives infused in the facades we walk past every day. Britain's history has been formed by its politics, religion and society, and these influences can be seen in the architectural styles that have shaped its

landscape From pre Roman and the Middle Ages to the Renaissance and the Industrial Revolution Classical and Gothic styles surged and retreated from favour only to then be challenged by a new player Modernism a style that reflected the stunning technological advances of the second half of the twentieth century In this narrative history Simon Jenkins the bestselling champion of our national heritage introduces us to the singular eccentric and sometimes rather ordinary characters who shaped Britain Jenkins teaches readers to see the world anew demystifying the elitist language of architecture so that we can all appreciate the buildings around us
