Liernur, Patricio Del Real, 2015 In 1955 The Museum of Modern Art staged *Latin American Architecture since 1945* a landmark survey of modern architecture in Latin America Published in conjunction with a new exhibition that revisits the region on the 60th anniversary of that important show *Latin America in Construction Architecture 1955 1980* offers a complex overview of the positions debates and architectural creativity from Mexico and Cuba to the Southern Cone between 1955 and the early 1980s The publication features a wealth of original materials that have never before been brought together to illustrate a period of self questioning exploration and complex political shifts that saw the emergence of the notion of Latin America as a landscape of development Richly illustrated with architectural drawings vintage photographs sketches and newly commissioned photographs the catalogue presents the work of architects who met the challenges of modernization with innovative formal urbanistic and programmatic solutions Today when Latin America is again providing exciting and challenging architecture and urban responses *Latin America in Construction* brings this vital post war period to light *Chilean Modern Architecture Since 1950* Fernando Pérez Oyarzún, Rodrigo Pérez de Arce, Horacio Torrent, 2010 Chilean architecture along with that of Sao Paulo and Mexico City sets a benchmark for the intersection of modernism with vernacular influences in Latin America Culture landscape and the geology of this earthquake prone region have all served as important filters for the practice of post 1950s design in Chile This volume introduces the modern architecture of Chile to readers in the United States Looking primarily at domestic architecture as a lens for studying the larger movement Fernando Perez Oyarzun considers the relationship between theory and practice in Chile As he shows in his chapter during the early 1950s the School of Valparaiso offered the possibility of developing experimental projects accompanied by theoretical statements There visual artists considered poetry the starting point of modern architecture and contributed their radically modern views to the design process of the project Next Rodrigo Perez de Arce examines the material context of architecture in Chile the availability of materials and technologies the frequency of violent earthquakes and related seismic activity and the nation s craft based labor intensive building practices He applies these considerations to a series of case studies to demonstrate how they interact with cultural historical economic and even political influences In the book s final chapter Horacio Torrent reviews the interplay between the architectonic culture and modern shapes that came into sharp focus in the 1950s in Chile In another series of case studies he highlights the formation of a system of concepts thought processes

instruments and values that have given Chilean architecture a certain singularity during the last fifty years *Latin American Modern Architectures* Patricio del Real, Helen Gyger, 2013-06-03 *Latin American Modern Architectures* Ambiguous Territories has thirteen new essays from a range of distinguished architectural historians to help you understand the region's rich and varied architecture. It will also introduce you to major projects that have not been written about in English. A foreword by historian Kenneth Frampton sets the stage for essays on well-known architects such as Lucio Costa and Flix Candela which will show you unfamiliar aspects of their work and for essays on the work of little-known figures such as Uruguayan architect Carlos Gmez Gavazzo and Peruvian architect and politician Fernando Bela nde Terry. Covering urban and territorial histories from the nineteenth and twentieth centuries along with detailed building analyses, this book is your best source for historical and critical essays on a sampling of Latin America's diverse architecture, providing much-needed information on key case studies. Contributors include Noem Adagio, Pedro Ignacio Alonso, Luis Castaeda, Viviana d'Auria, George F. Flaherty, Mara Gonzlez, Pend's Cristina Lpez, Uribe Hugo, Mondrag n Lpez, Jorge Nudelman, Blejwas Hugo, Palmarola, Sagredo, Gaia, Piccarolo, Claudia Shmidt, Daniel Talesnik, and Paulo Tavares. **Constructing Latin America** Patricio del Real, 2022-05-24 A nuanced look at how the Museum of Modern Art's carefully curated treatment of Latin American architecture promoted U.S. political, economic, and cultural interests. In the interwar period and immediately following World War II, the U.S. government promoted the vision of a modern, progressive, and democratic Latin America and worked to cast the region as a partner in the fight against fascism and communism. This effort was bolstered by the work and products of many institutions, including the Museum of Modern Art, New York. Using modern architecture to imagine a Latin America under postwar U.S. leadership, MoMA presented blockbuster shows including *Brazil Builds 1943* and *Latin American Architecture since 1945* 1955 that deployed racially coded aesthetics and emphasized the confluence of Americanness and modernity in a globalizing world. Delving into the heated debates of the period and presenting never-before-published internal documents and photos from the museum and the Nelson A. Rockefeller archives, Patricio del Real is the first to fully address MoMA's role in U.S. cultural imperialism and its consequences through its exhibitions on Latin American art and architecture. **Valences of Historiography** Gevork Hartoonian, 2024-12-30 The compiled essays offer various themes and ways of approaching historiography. Each chapter probes the state of contemporary theorization of architecture histories, working toward the theme of critically re-writing history. Essential to each author's contribution are specific traditions created by the mole of history burrowing through the past. This book concerns the historian's conjectures towards capturing the past and present zeitgeist. Temporality is the theme running through the narrative of this volume. It raises the question of whether the ever-growing body of work on architectural history should be considered as history. More specifically, what is the intersection between history and architectural history? Furthermore, can every text focused on architecture's past be considered categorically historiographic? In what capacity does architectural history index history beyond contingencies and

without reducing the text to empirical realities and the historian's interest in a specific subject including those collected through archival research itself an emblem of textuality This book upholds the conviction that the past should be recalled accurately and that there is no history but historical criticism the scope of which exceeds the historicity of Humanism Dialectically the timeline experienced across contemporary techno economic and cultural domains aesthetics offers an opportunity to explore architecture produced outside the Euro American continents Valences of Historiography offers a fresh take on architectural history that is useful for academics researchers and architecture students **Encyclopedia of**

Twentieth Century Architecture R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries *Brazil Built* Zilah Quezado Deckker, 2013-09-13 *Brazil Built* is an examination of the architecture of the Modern Movement in Brazil In the 1940s and 1950s Brazil acquired unprecedented prestige in the world of Modern architecture Brazil was regarded as the country which had inherited the progressive Modernism of the pre war period in Europe and which furthermore had initiated a new phase of the assimilation of cultural and environmental considerations This book constitutes a unique presentation of the major Modern buildings in Brazil in a historical context Prompted by the contemporary re evaluation of Modernism and renewed interest in Brazil this book examines how these Modern buildings came into being how they came to be so highly regarded and the changing reactions to them in Brazil and abroad *The Routledge Companion to Architectural Pedagogies of the Global South* Harriet Harriss, Ashraf M. Salama, Ane Gonzalez Lara, 2022-12-30 The established canon of architectural pedagogy has been predominantly produced within the Northern hemisphere and transposed or imposed across schools within the Global South more often with scant regard for social economic political or ecological culture and context nor regional or indigenous pedagogic principles and practices Throughout the Global South architecture's academic community has been deeply affected by this regime how it shapes and influences proto professionals and by implication architectural processes and outcomes too The Routledge Companion to Architectural Pedagogies of the Global South resituates and recenters an array of pedagogic approaches that are either produced or proliferate from the Global South while antagonizing the linguistic epistemological and disciplinary conceits that under imperialist imperatives ensured that these pedagogies remained maligned or marginalized The book maintains that the exclusionary implications of architectural notions of the orders the canon and the core have served to constrain and to calcify its contents and in doing so imperiled its relevance and impact In contrast this companion of pedagogic approaches serves to evidence that architecture's

academic and professional advancement is wholly contingent on its ability to fully engage in an additive and inclusive process whereby the necessary disruptions that occur when marginalized knowledge confronts established knowledge result in a catalytical transformation through which new co created knowledge can emerge Notions of tradition identity modernity vernacularism post colonialism poverty migration social and spatial justice climate apartheid globalization ethical standards and international partnerships are key considerations in the context of the Global South How these issues originate and evolve within architectural schools and curricula and how they act as drivers across all curricula activities are some of the important themes that the contributors interrogate and debate With more than 30 contributions from 55 authors from diverse regional racial ethnic gender and cultural backgrounds this companion is structured in four sections that capture critique and catalog multifarious marginalized pedagogical approaches to provide educators and students with an essential source book of navigational steers core contestations propositional tactics and reimaged rubrics The Routledge Companion to Architectural Pedagogies of the Global South pioneers a transposable strategy for academics from all disciplines looking to adopt a tested approach to decolonizing the curriculum It is only through a process of destabilizing the hegemonic epistemological and disciplinary frameworks that have long prescribed architecture s pedagogies that the possibility of more inclusive representative and relevant pedagogical practices can emerge

Cuban Modernism Victor Deupi, Jean-Francois Lejeune, 2021-02-08 In the 20th century modern architecture thrived in Cuba and a wealth of buildings was realized prior to the revolution 1959 and in its wake The designs comprise luxurious nightclubs and stylish hotels sports facilities elegant private homes and apartment complexes Drawing on the vernacular their architects defined a way to be modern and Cuban at the same time creating an architecture oscillating between tradition and avantgarde Audacious concrete shells curving ramps elegant brises soleils and a fluidity of interior and exterior spaces are characteristic of an airy often colorful architecture well suited to life in the tropics New photographs and drawings were specially prepared for this publication A biographical survey portraits the 40 most important Cuban architects of the era
