Institutions For Future Generations Iñigo González-Ricoy, Axel Gosseries, 2016-12-15 In times of climate change and public debt a concern for intergenerational justice should lead us to have a closer look at theories of intergenerational justice It should also press us to provide institutional design proposals to change the decision making world that surrounds us This book provides an exhaustive overview of the most important institutional proposals as well as a systematic and theoretical discussion of their respective features and advantages It focuses on institutional proposals aimed at taking the interests of future generations more seriously and does so from the perspective of applied political philosophy being explicit about the underlying normative choices and the latest developments in the social sciences It provides citizens activists firms charities public authorities policy analysts students and academics with the body of knowledge necessary to understand what our institutional options are and what they entail if we are concerned about today s excessive short termism **Efficiency,**

Sustainability, and Justice to Future Generations Klaus Mathis, 2011-08-13 Fifty years after the famous essay *The Problem of Social Cost* 1960 by the Nobel laureate Ronald Coase Law and Economics seems to have become the lingua franca of American jurisprudence and although its influence on European jurisprudence is only moderate by comparison it has also gained popularity in Europe A highly influential publication of a different nature was the Brundtland Report 1987 which extended the concept of sustainability from forestry to the whole of the economy and society According to this report development is sustainable when it meets the needs of the present without compromising the ability of future generations to meet their own needs A key requirement of sustainable development is justice to future generations It is still a matter of fact that the law as well as the theories of justice are generally restricted to the resolution of conflicts between contemporaries and between people living in the same country This in turn raises a number of questions what is the philosophical justification for intergenerational justice What bearing does sustainability have on the efficiency principle How do we put a policy of sustainability into practice and what is the role of the law in doing so The present volume is devoted to these questions In Part One Law and Economics the role of economic analysis and efficiency in law is examined more closely Part Two Law and Sustainability engages with the themes of sustainable development and justice to future generations Finally Part Three Law Economics and Sustainability addresses the interrelationships between the different aspects *Justice for*

Future Generations Peter Lawrence, 2014-04-25 Peter Lawrence s *Justice for Future Generations* breaks new ground by using a multidisciplinary approach to tackle the issue of what ethical obligations current generations have towards future generations in addressing the threat of climate change This **Strengthening Medicare for Future Generations** United States. Congress. House. Committee on Ways and Means. Subcommittee on Health, 2000 [A Philosophy for Future Generations](#) Tiziana Andina, 2022-01-13 If societies like institutions are built to endure then the bond that exists between generations must be considered Constructing a framework to establish a philosophy of future generations Tiziana Andina

explores the factors that make it possible for a society to reproduce over time Andina's study of the diachronic structure of societies considers the never ending passage of generations as each new generation comes to form a part of the new social fabric and political model Her model draws on the anthropologies offered by classical political philosophies such as Hobbes and Machiavelli and the philosophies of power as discussed by Nietzsche She confronts the ethics and function of this fundamental relationship examines the role of transgenerationality in the formation and endurance of Western democracies and recognizes an often overlooked problem each new generation must form part of social and political arrangements designed for them by the generations that came before

Citizen Science for Future Generations Reuven Yosef, Piotr Tryjanowski, 2022-03-02 **Sustainability and the Economics of Assuring Assets for Future Generations** Richard B. Norgaard, 1992 **Safeguarding Social Security for Future Generations** W. Andrew Achenbaum, 2023-02-24 This book

offers a unique multigenerational approach to saving Social Security Public programs have adapted to societal aging but fears overwhelm hopes for Social Security's future prospects Conservatives want to privatize operations that liberals seek to expand Younger workers are happy that Social Security protects their elders but most do not expect benefits when needed Achenbaum reframes conflicting perspectives and offers new models of respectful transgenerational dialogue that can mobilize pragmatic reforms Designed for use in gerontology social work and public policy courses Safeguarding Social Security for Future Generations offers measured hope for leaving a legacy that safeguards the common good Showing Social Solidarity with Future Generations Marianne Takle, 2024-09-10 Today's generations can affect the future ecosystem more than any previous generations and aggravate the welfare of future people People who have not yet been born are excluded from political decisions important to their lives Due to the future generations lack of influence current generations have a responsibility to act The current generation's responsibility for the well being of future generations has been used as an argument for an increasing number of legislative and policy measures across the world but are rarely followed up in practice This book examines when commitments to future generations are followed up in practice and in what situations they are not A concept of solidarity with future generations is developed and applied to four policy areas the UN 2030 Agenda national political institutions for future generations constitutions and climate lawsuits and regulations of economic debt or savings for future generations Germany and Norway are selected as cases to evaluate what the commitments might entail in practice The book highlights where the gaps emerge and what needs to be done The failing transition from the global to the national level highlights a need for stronger cosmopolitan elements in the international political system Institutional bindings are generally weak at the national level Financial restrictions show it is possible to establish strong institutional constraints but the focus on financial resources is too narrow Both national and global institutional bindings must be strengthened to show social solidarity with future generations *Future Generations and International Law* Emmanuel Agius, Salvino Busuttil, 2013-12-19 Sustainable development requires consideration of the quality of life that future generations will be able

to enjoy and as the adjustment to sustainable lifestyles gathers momentum the rights of future generations and our responsibility for their wellbeing is becoming a central issue In this the first book to address this emerging area of international law leading experts examine the legal and theoretical frameworks for representing and safeguarding the interests of future generations in current international treaties This unique volume will be required reading for academics and students of international environmental law and policy Emmanuel Agius is Senior Lecturer at the Faculty of Theology and Coordinator of the Future Generations Programme at the Foundation for International Studies University of Malta Salvino Busuttil is former Director General of the Foundation for International Studies Future Generations and International Law is the seventh volume in the International Law and Sustainable Development series co developed with FIELD The series aims to address and define the major legal issues associated with sustainable development and to contribute to the progressive development of international law Other titles in the series are Greening International Law Interpreting the Precautionary Principle Property Rights in the Defence of Nature Improving Compliance with International Environmental Law Greening International Institutions and Quotas in International Environmental Agreements A legal parallel to the Blueprint series welcome timely and provocative David Pearce Originally published in 1997 **Giving Future Generations a Voice** Linehan, Jan, Lawrence, Peter, 2021-08-27 This important book focuses on how newly emerging institutions for future generations can contribute to tackling large scale global environmental problems such as threats to biodiversity and climate change It is especially timely given the new global impetus for decarbonisation as well as the huge growth of climate litigation and climate protest movements often led by young people *Ethics and Future Generations* Rahul Kumar, 2018-10-18 Existing human beings stand in a unique relationship of asymmetrical influence over future generations Our choices now can settle whether there are any human beings in the further future how many will exist what capacities and abilities they might have and what the character of the natural world they inhabit is like This volume with contributions from both new voices and prominent established figures in moral and political philosophy examines three generally underexplored themes concerning morality and our relationship to future generations First would it be morally wrong to allow humanity to go extinct Or do we have moral reasons to try and ensure that humanity continues into the indefinite future Second if humanity is to continue into the future how many people should there be And is it morally important whether they have lives that are of high quality or are just barely worth living And third how can we best make sense of the intuitive idea that by not taking action on climate change and preserving natural resources we are in some way wronging future generations This book was originally published as a special issue of the Canadian Journal of Philosophy *Environmental Justice and the Rights of Unborn and Future Generations* Laura Westra, 2012-05-04 1 The child's rights to health and the environment and the role of the World Health Organization 2 The status of the preborn in civil law instruments 3 The status of the child and the preborn in common law instruments and cases 4 Supranational governance the European Court of

Human Rights and the WTO WHO conflict 5 The impact of consumerism and social policy on the health of the child 6 Future generations rights linking intergenerational and intragenerational rights in ecojustice 7 Ecojustice and consideration for the future the persistence of ecofootprint disasters 8 Ecojustice and industrial operations irreconcilable conflict or possible coexistence 9 Developmental and health rights of children in developing countries towards a model legislation for the rights of the child to health

In Fairness to Future Generations Edith Brown Weiss, 2025-01-27 Professor Weiss combines thorough research and careful analysis with imaginative solutions and a moral fervor She shows how rules of international law can be applied in an intertemporal dimension and how the basic principles of the intergenerational equity can be developed to provide new standards for human behavior She manages to communicate to the reader not only that the situation is getting desperate but also that human intelligence can in time devise adequate remedies without destroying completely our way of life Louis B Sohn Woodruff Professor of International Law Published under the Transnational Publishers imprint

Business, Government and Sustainable Development Gerard Keijzers, 2005 Keijzers provides an introduction to the evolution of the collaborative stakeholder approach to sustainable development in the context of changing environmental policies

Protecting future generations through commons Saki Bailey, Gilda Farrell, Ugo Mattei, 2014-01-09 The recent austerity measures currently adopted in numerous European countries assume that a rise in public debt should automatically result in cuts to social programmes and the privatisation of inefficiently managed resources This type of reasoning is being used to justify the destruction of social rights of citizens for the profit of the private sector resulting in more limited access to the most fundamental resources such as water nature housing culture knowledge and information mainly for the most vulnerable members of society Such a view informed solely by short term growth and profit cycles is endangering access to those resources not only for current generations but for future ones as well This book is an attempt to go beyond liberal approaches to intergenerational and distributive justice It emphasises the role of commons and communities of the commons driven by the desire to defend and perpetuate those fundamental resources under the threat of expropriation by the state and the market This book also offers policy makers and citizens who wish to accept their political responsibility by being active and refusing corporate ideology some best practices as well as methods and solutions for renewing the configurations of societal relationships through commons thereby integrating the interests of future generations in the European Community's decision making processes and institutions This is a contribution by the Council of Europe and the International University College of Turin to the protection of the dignity of every person especially of those who even though unable to enjoy existing social rights have the right to benefit from choices and policies that ensure that human life remains unspoiled
