From Plato To Nato The Idea Of The West And Its Opponents:

From Plato to NATO David Gress, 1998 The end of the Cold war and the imminent unification of Europe raises urgent questions about the future of the Western Alliance FROM PLATO TO NATO analyses European civilisation's legacy from its inception and traces the ongoing debate about the West through to the present day David Gress assesses historical accounts of the West and argues that while often attacked as a cover for exploitation the legitimacy and unity of the West appears to contain both the rationality of the enlightenment and the mythological visions of fascism It will be up to the Westerners to choose which West they want to embrace FROM PLATO TO NATO is the first book to make sense of the enduring value of Western politics and culture at a time when the West is facing its greatest challenge since World War Two how to include new democracies in a world order that is struggling to preserve the egalitarian values of the Western Tradition **The Idea of the West** Alastair Bonnett, 2017-04-29 The West is on everyone's lips it is defended celebrated hated But how and why did it emerge And whose idea is it This book is about representations of the West Drawing on sources from across the world from Russia to Japan Iran to Britain it argues that the West is not merely a Western idea but something that many people around the world have long been creating and stereotyping The Idea of the West looks at how the great political and ethnic forces of the last century defined themselves in relation to the West addresses how Soviet communism Asian spirituality Asian values and radical Islamism used and deployed images of the West Both topical and wide ranging it offers an accessible but provocative portrait of a fascinating subject and it charts the complex relationship between whiteness and the West **The Uniqueness of Western Civilization** Ricardo Duchesne, 2011-02-07 This extensively researched book argues that the development of a libertarian culture was an indispensable component of the rise of the West The roots of the West's superior intellectual and artistic creativity should be traced back to the aristocratic warlike culture of Indo-European speakers Among the many fascinating topics discussed are the ascendancy of multicultural historians and the degradation of European history China's ecological endowments and imperial windfalls military revolutions in Europe 1300 1800 the science and chivalry of Henry the Navigator Judaism and its contribution to Western rationalism the cultural richness of Max Weber versus the intellectual poverty of Pomeranz Wong Goldstone Goody and A G Frank change without progress in the East Hegel's Phenomenology of the Western Spirit Nietzsche and the education of the Homeric Greeks Kojeve's master slave dialectic and the Western state of nature Christian virtues and German aristocratic expansionism Globalization and Civilizations Mehdi Mozaffari, 2003-09-02 Globalization and Civilizations challenges established assumptions about the nature of civilizations and the supposed inevitability of the conflict between the Islamic and Western worlds Uniquely this edited book critically interrogates the concept of civilization by asking whether it is still valid in the globalized world economy of the twenty first century The first half of the book provides an historical and theoretical context to understand the idea of civilization in political science and demonstrates how the various social economic political and cultural processes of globalization have

radically altered perceptions of civilization The second half of the book looks particularly at non Western examples of the interaction between globalization and civilization and includes case studies on the Arab world Islam China India and Europe

Political Islam, World Politics and Europe Bassam Tibi, 2014-07-11 The new and updated edition of Political Islam World Politics and Europe focusses on the shift within political Islam in light of 9 11 and the events of the Arab Spring from a jihadist struggle to institutional Islamism Refuting what has often been referred to by commentators as the moderation of Islamism the second edition of this book introduces the concept of institutional Islamism a process which Tibi argues was accelerated in the aftermath of the Arab Spring Both jihadist and institutional Islamism pursue the same goal of an Islamist state but disagree fundamentally on the strategy for achieving it Whilst jihadism is committed to the idea of a violent Islamic world revolution institutional Islamism embraces political institutions as a means to an end Turning to the events of the Arab Spring in Tunisia Libya and Egypt this book attempts to determine whether an abandonment of violence is enough to underpin a shift to genuine democracy Analysing the fall of Morsi in particular Tibi questions what lessons can be learnt from his presidency and argues that this event will not change the overall trend of development from jihadism to institutional Islamism A timely addition to existing literature this book will be of interest to students and scholars studying Middle Eastern and European Politics Political Islam and International Relations

Islam Between Culture and Politics Bassam Tibi, 2005-08-31 Bassam Tibi offers a radical solution to the problems faced by Islam in a rapidly changing and globalizing world He proposes a depoliticization of the faith and the introduction of reforms to embrace secular democracy pluralism civil society and individual human rights The alternative to this is the impasse of fundamentalism The pivotal argument is that Islam is being torn between the pressure for cultural innovation and a defensive move towards the politicization of its symbols for non religious ends

Contemporary Perspectives in Critical and Social Philosophy J. Rundell, et al, 2005-01-01 This volume is also published as volume 5 of the journal Critical Horizons ISSN 1440 9917 Contemporary Perspectives in Critical and Social Philosophy brings together a range of essays concerning ways of conceptualising modernities subjectivities and recognition It highlights recent developments in German critical and social philosophy and includes essays by Martin Seel Christoph Menke Max Pensky Andrew Bowie and Karl Ameriks and critical discussions of the works of Manfred Frank Theodor Adorno and Axel Honneth These recent developments open onto dialogues between hermeneutics post structuralism Critical Theory and the Budapest School represented here by Agnes Heller and Maria Markus The essays contribute to debates regarding the modern constellation between those who at first glance may be viewed as protagonists but from the perspective of greater distance share similar concerns and pre occupations

Masquerade Edward W. Chynoweth, 2005-11-09 Chynoweth asserts that the feminist message is false His topics include the roots of the falsehood which stem in part from the 1964 Civil Rights Act s Title VII the right order of the human sexes the role of art and culture marriage biblical paradigms and his interpretation of Catholic thought His chapter entitled History as a Society

Column for Lovely Ladies Herstory is interesting as is his summary of thought on egalitarianism from Aristotle to Bryce and Stephen. The bibliography is shorter than one would expect. Hamilton Books is an imprint of the University Press of America. Annotation 2006 Book News Inc Portland OR booknews.com *Civilization* Giovanni Borgognone, Patricia Chiantera-Stutte, 2022-09-29 Civilizations or rather narratives about civilizations matter not only as research subjects in textbooks literary and scientific essays but also in politics. This seems to be the case in civilizational states such as China Russia Turkey and Syria. Also in Western countries in recent decades the notion of civilization has often been used in public discourse political parties and leaders have referred in particular to the need to protect Western civilization calling in this regard for policies to restrict immigration from Muslim countries. In 2022 the narrative on civilization was used to legitimize the Russian invasion of Ukraine. The studies in this collected volume reconstruct how civilizational paradigms and narratives have been used to explain political relations to define the global order to justify attempts to gain hegemony over particular geopolitical areas and to make predictions on global developments in specific times of crisis. In particular this book analyzes the concepts of civilization as they have been used in the intellectual and political discourse in periods particularly critical for global relations and for the consolidation or contestation of the West's dominant role in international national politics and academic discourse *Geopolitics* John Agnew, 2004-03-01 Geopolitics identifies and scrutinizes the central features of geopolitics from the sixteenth century to the present. The book focuses on five key concepts of the modern geopolitical imagination: Visualising the world as a whole; The definition of geographical areas as advanced or primitive; The notion of the state being the highest form of political organization; The pursuit of primacy by competing states; The necessity for hierarchy.

The Palgrave Handbook of German Idealism M. Altman, 2017-12-01 The Palgrave Handbook of German Idealism features essays from leading scholars on German philosophy. It is the most comprehensive secondary source available covering not only the full range of work by Kant Fichte Schelling and Hegel but also idealists such as Reinhold and Schopenhauer critics such as Jacobi Maimon and the German Romantics **The God That Did Not Fail** Robert Royal, 2010 Secular humanists and other progressives have been predicting the demise of religion for the past 250 years. But they keep running into a problem: those who were supposed to be liberated by the secular gospel that God is Dead aren't buying it. Except for some parts of western Europe and in countries culturally destroyed by Communism secularization in the radical sense has not occurred. While it has not obliterated the religious impulse however the drive towards progressive irreligion has. Robert Royal believes encouraged ignorance of religion's central role in the development of the West. In *The God That Did Not Fail* Royal offers an original reading of religion in ancient Greece and Rome of Christianity and Judaism the Middle Ages the Renaissance and Reformation the several modern Enlightenments culminating with a profound assessment of our current postmodern moment. He concludes that since religion is a permanent part of human nature and of the particular character of the West our efforts should be directed not into a quixotic effort to deny the undeniable especially as we face

challenges from Islamic fundamentalism but into promoting a well thought out and dynamic interplay of faith reason and modern freedoms

1998 Massimo Mastrogregori,2013-05-08 Annually published since 1930 the International bibliography of Historical Sciences IBOHS is an international bibliography of the most important historical monographs and periodical articles published throughout the world which deal with history from the earliest to the most recent times The works are arranged systematically according to period region or historical discipline and within this classification alphabetically The bibliography contains a geographical index and indexes of persons and authors

Conceptualizing the West in International Relations Thought J. O'Hagan,2002-04-09 West is a concept widely used in international relations but we rarely reflect on what we mean by the term Conceptions of and what the West is vary widely This book examines conceptions of the West drawn from writers from diverse historical and intellectual contexts revealing both interesting parallels and points of divergence It also reflects on implications of these different perceptions of how we understand the role of the West and its interactions with other civilizational identities

Defining the Atlantic Community Marco Mariano,2010-05-25 In this volume essays by scholars from both sides of the Atlantic open new perspectives on the construction of the Atlantic community during World War II and the early Cold War years Based on original approaches bringing together diplomatic history and the history of culture and ideas the book shows how atlantism came to provide a solid ideological foundation for the security community of North American and European nations which took shape in the 1940s The idea of a transatlantic community based on shared histories values and political and economic institutions was instrumental to the creation of the Atlantic Alliance and partly accounts for the continuing existence of the Atlantic partnership after the Cold War At the same time this study breaks new ground by arguing that the emergence of the idea of Atlantic community also reflected deeper trends in transatlantic relations in fact it was the outcome of the re definition of the West due to the rise of the US and the decline of Europe in the international arena during the first half of the Twentieth Century

The US Military Profession into the 21st Century Sam Sarkesian,Robert Connor,2006-04-18 This brand new edition of The US Military Profession into the Twenty First Century re examines the challenges faced by the military profession in the aftermath of the international terrorist attack on the United States on September 11 2001 While many of the issues facing the military profession examined in the first edition remain the new war and international terrorism have compounded the challenges The US military must respond to the changed domestic and strategic landscapes without diminishing its primary function a function that now many see that goes beyond success on the battlefield Not only has this complicated the problem of reconciling the military professional ethos and *raison d'etre* with civilian control in a democracy it challenges traditional military professionalism This book also studies the notion of a US military stretched thin and relying more heavily on the US Federal Reserves and National Guard These developments make the US military profession increasingly linked to public attitudes and political perspectives In sum the challenge faced by the US military profession can be termed a dual dilemma It must respond

effectively to the twenty first century strategic landscape while undergoing the revolution in military affairs and transformation At the same time the military profession must insure that it remains compatible with civilian cultures and the US political social system without eroding its primary function This is an invaluable book for all students with an interest in the US Military and of strategic studies and military history in general *Jus Gentium in Humanist Jurisprudence* Susan Longfield Karr,2023-01-23 This book explores how the fathers of humanist jurisprudence contributed to the emergence of ius gentium as the common law not simply of Europe but of all mankind in the early sixteenth century They did so by so thoroughly reinterpreting terms idioms and categories preserved within Justinian s Digest that they fundamentally transformed them to address sources and limits of political and legal authority in the broader context of early modern state formation In the process they offered theories of universal jurisprudence grounded in the attributes and actions of man and states that anticipated some of the most salient features of modern sovereignty and rights Theories that we tend to identify with post Reformation political and legal thought rather than the early Renaissance *Mapping European Security After Kosovo* Peter Van Ham,Sergei Medvedev,2002-10-25 This book provides new and stimulating perspectives on how Kosovo has shaped the new Europe It breaks down traditional assumptions in the field of security studies by sidelining the theoretical worldview that underlies mainstream strategic thinking on recent events in Kosovo The contributors challenge the epistemological definition of the Kosovo conflict arguing that we should not only be concerned with the Kosovo out there but also with the debate about what counts as security and how our definition of security is shaped by various power and knowledge interests in Kosovo **The European Culture Area** Terry G. Jordan-Bychkov,Bella Bychkova Jordan,2002 Now in its fourth edition this leading text has been extensively revised to reflect the sweeping changes the past decade have brought to Europe and to incorporate new research in the field Employing a richly topical rather than a mechanistic region by region approach the book simultaneously presents the overarching unity of Europe as a human entity and its underlying internal diversity Inclusive intellectual rich in ideas lively controversial humanistic and above all interesting The European Culture Area is the text of choice for courses on the geography of Europe Visit our website for sample chapters *The Betrayal* Kim Christian Priemel,2018-05-17 At the end of World War II the Allies faced a threefold challenge how to punish perpetrators of appalling crimes for which the categories of genocide and crimes against humanity had to be coined how to explain that these had been committed by Germany of all nations and how to reform Germans The Allied answer to this conundrum was the application of historical reasoning to legal procedure In the thirteen Nuremberg trials held between 1945 and 1949 and in corresponding cases elsewhere a concerted effort was made to punish key perpetrators while at the same time providing a complex analysis of the Nazi state and German history Building on a long debate about Germany s divergence from a presumed Western path of development Allied prosecutors sketched a historical trajectory which had led Germany to betray the Western model Historical reasoning both accounted for the moral breakdown of a civilised nation and

rendered plausible arguments that this had indeed been a collective failure rather than one of a small criminal clique. The prosecutors therefore carefully laid out how institutions such as private enterprise, academic science, the military or bureaucracy which looked ostensibly similar to their opposite numbers in the Allied nations had been corrupted in Germany even before Hitler's rise to power. While the argument depending on individual protagonists, subject matters and contexts met with uneven success in court, it offered a final twist which was of obvious appeal in the Cold War to come: if Germany had lost its way, it could still be brought back into the Western fold. The first comprehensive study of the Nuremberg trials, *The Betrayal* thus also explores how history underpins transitional trials as we encounter them in today's courtrooms from Arusha to The Hague.
