From Conflict to Coalition Adam Dean,2016-09-08 International trade often inspires intense conflict between workers and their employers In this book Adam Dean studies the conditions under which labor and capital collaborate in support of the same trade policies Dean argues that capital labor agreement on trade policy depends on the presence of profit sharing institutions He tests this theory through case studies from the United States Britain and Argentina in the late nineteenth and early twentieth centuries they offer a revisionist history placing class conflict at the center of the political economy of trade Analysis of data from more than one hundred countries from 1986 to 2002 demonstrates that the field s conventional wisdom systematically exaggerates the benefits that workers receive from trade policy reforms From Conflict to Coalition boldly explains why labor is neither an automatic beneficiary nor an automatic ally of capital when it comes to trade policy and distributional conflict
