The Oxford Handbook of Gender and Politics Georgina Waylen, 2013-04-04 The *Oxford Handbook of Gender and Politics* brings to political science an accessible and comprehensive overview of the key contributions of gender scholars to the study of politics and it shows how these contributions produce a richer understanding of politics and societies

Glocal Governance Anja Mihr, 2022-06-27 This open access book develops a conceptual framework for glocal governance as a multi stakeholder local governance approach based on global human rights norms and democratic principles It discusses glocal governance as part of an ongoing global transformation process that began in the 1990s when democracy and individualizing responsibilities for governance became the dominant political system worldwide

and continues through today's dawn of a New Cold War between those countries which have democratized and those which haven't. This book will intrigue practitioners and scholars alike who are interested in the concepts of glocality and glocalism, local/global connectivity and the implementation and dissemination of global norms and concepts such as human rights and democracy at the local and community level as well as among civil society and private enterprises. The author argues that global norms have now become universal benchmarks which private political and civil actors use to assess day to day situations and market developments and to make their decisions accordingly. This book will appeal to students, practitioners and scholars of the social sciences and humanities who are interested in governance, human rights, public diplomacy and international relations and in conceptualizing mechanisms for governing and enforcing political decisions locally on the basis of global universal principles, international norms and laws.

Introducing Human Geographies Paul Cloke, Philip Crang, Mark Goodwin, 2013-12-05. *Introducing Human Geographies* is the leading guide to human geography for undergraduate students, explaining new thinking on essential topics and discussing exciting developments in the field. This new edition has been thoroughly revised and updated and coverage is extended with new sections devoted to biogeographies, cartographies, mobilities, non-representational geographies, population geographies, public geographies and securities. Presented in three parts with 60 contributions written by expert international researchers, this text addresses the central ideas through which human geographers understand and shape their subject. Part I: Foundations engages students with key ideas that define human geography's subject matter and approaches through critical analyses of dualisms such as local/global, society/space and human/nonhuman. Part II: Themes explores human geography's main sub-disciplines with sections devoted to biogeographies, cartographies, cultural geographies, development geographies, economic geographies, environmental geographies, historical geographies, political geographies, population geographies, social geographies, urban and rural geographies. Finally, Part III: Horizons assesses the latest research in innovative areas from mobilities and securities to non-representational geographies. This comprehensive, stimulating and cutting-edge introduction to the field is richly illustrated throughout with full-colour figures, maps and photos. These are available to download on the companion website located at www.routledge.com/9781444135350.

Glocalization Victor Roudometof, 2016-06-10. This book seeks to provide a critical introduction to the under-theorized concept of Glocalization. While the term has been slowly diffused into social scientific vocabulary to date, there is no book in circulation that specifically discusses this concept. Historically, theorists have intertwined the concepts of the global and the glocal or have subsumed the glocal under other concepts such as cosmopolitanization. Moreover, theorists have failed to give local due attention in their theorizing. The book argues that the terms global, the local and the glocal are in need of unambiguous and theoretically and methodologically sound definitions. This is a prerequisite for their effective operationalization and application into social research. Glocalization is structured in two parts. Part I introduces the term, seeking to provide a history and critical assessment of theorists' past use of glocalization.

and offering an alternative perspective and a clear effective and applicable definition of the term explaining the limitations of the term globalization and the value of defining glocalization Part II then moves on to illustrate how the concept of glocalization can be used to broaden our understanding and analysis of a wide range of issues in world politics including the 21st century culture of consumption transnationalism cosmopolitanism nationalism and religious traditions Utilizing a wide range of historical ethnographic and real life examples from various domains this work will be essential reading for students and scholars of Globalization and will be of great interest to those in the field of Global Transnational and Cosmopolitan Studies

Where Metaphors Come From Zoltán Kövecses,2015-02-12 In Where Metaphors Come From Zolt n K vecses proposes a metaphorical grounding that augments and refines conceptual metaphor theory according to which conceptual metaphors are based on our bodily experience While this is certainly true in many cases of metaphor the role of the body in metaphor creation can and should be reinterpreted and consequently the body can

be seen as just one of the several contexts from which metaphors can emerge including the situational discourse and conceptual cognitive contexts although perhaps the dominant or crucial one K vecses is a leader in CMT and his argument in this book is more in line with what has been discovered about the nature of human cognition in recent years namely that human cognition is grounded in experience in multiple ways embodiment in a strict sense being just one of them see Barsalou 2008 Gibbs 2006 Pecher and Zwaan 2005 In light of the present work this is because cognition including metaphorical cognition is grounded in not only the body but also in the situations in which people act and lead their lives the discourses in which they are engaged at any time in communicating and interacting with each other and the conceptual knowledge they have accumulated about the world in the course of their experience of it **The Urban Geography Reader** NICK FYFE,JUDITH KENNY,2020-04-15 Drawing on a rich diversity of theoretical approaches and analytical strategies urban geographers have been at the forefront of understanding the global and local processes shaping cities and of making sense of the urban experiences of a wide variety of social groups Through their links with those working in the fields of urban policy design urban geographers have also played an important role in the analysis of the economic and social problems confronting cities Capturing the diversity of scholarship in the field of urban geography this reader presents a stimulating selection of articles and excerpts by leading figures Organized around seven themes it addresses the changing economic social cultural and technological conditions of contemporary urbanization and the range of personal and public responses It reflects the academic importance of urban geography in terms of both its theoretical and empirical analysis as well as its applied policy relevance and features extensive editorial input in the form of general section and individual extract introductions Bringing together in one volume classic and contemporary pieces of urban geography studies undertaken in the developed and developing worlds and examples of theoretical and applied research it provides in a convenient student friendly format an unparalleled resource for those studying the complex geographies of urban areas Localizing Knowledge in a Globalizing World Ali Mirsepassi,Amrita Basu,Frederick Weaver,2003-01-01 The essays in this collection address the current crisis in area studies a crisis that differs from its perennial struggle with the established academic disciplines This crisis stems from the confluence of three related circumstances the end of the Cold War greater economic and cultural fluidity across political borders and contradictory intellectual trends in the academy which include on the one hand a renaissance of universalizing thinking in the social sciences and on the other hand the rise of post colonial studies and debates about modernity postmodernity and cultural hybridization Although the essays differ markedly in their focus and strategies the authors all demonstrate that local knowledge including serious study of individual cultures and proficiency in foreign languages which are vital to understanding rapidly changing global patterns and to countering universal claims by the social sciences While the authors also agree that area studies must reject their ethnocentric heritages and adopt inventive new contours they present a diversity **International Social Science Journal** ,2005-06 *Partnership and Leadership* T. de Bruijn,Arnold

Tukker,2002-03-31 Similarly leadership can be seen as an obstacle to sustainable development if leaders form close circles and are not willing to share experiences with other actors but leadership could also be considered as an important element to keep concepts and practices forward The book holds this double perspective explaining mapping and analyzing different goals formats methods of more and less collaborative approaches but at the same time taking a critical approach to the theme by understanding related risks effects prospects and corrective actions *International Relations and Area Studies*

Silvia D'Amato,Matteo Dian,Alessandra Russo,2023-11-11 Discover the intricate tapestry of international politics and governance with this book The book delves into the diverse nature of globally significant actors and systems across multiple regions From Africa to Asia Europe to the Middle East this collection of thought provoking case studies explores the role of regional actors in the international system Combining theoretical innovation with empirical analysis this volume expands the boundaries of International Relations IR and Area Studies AS showcasing their interconnections throughout history and in contemporary contexts Through illuminating case studies drawn from the fields of Comparative Regionalism and Non Western IR Theory the book sheds light on pressing international events Unpacking complex questions the contributors examine the application of IR scholarship to global events and provide fresh insights into political dynamics conflicts and state instability across various regions By offering a comparative perspective on threats political contestation and security policies this book challenges existing perspectives and enriches the debate With its methodological and epistemological explorations this book is an indispensable resource for scholars and students of international relations and security studies as well as researchers focusing on specific world areas Embark on a captivating journey through the multifaceted landscape of global affairs *Spaces of Geographical Thought*
