Monsoon as Method Lindsay Bremner, Beth Cullen, Christina Leigh Geros, Harshavardhan Bhat, Anthony Powis, 2022-05-25 An edited volume by Monsoon Assemblages a European Research Council funded research project The book presents the methods that Monsoon Assemblages has evolved for engaging the monsoon a globally connected weather system as a coproducer of urban life and

space in South and Southeast Asian cities It challenges views of climate as an inert backdrop to urban life instead suggesting that it is materially and spatially active in shaping urban politics ecologies infrastructures buildings and bodies It combines critical texts with cartography photography and ethnography to present the project s methodology and its outcomes and invites urban practitioners to think differently about space time representation and human and non human agency It offers intra disciplinary intra active methods for rethinking human and non human relations with weather in ways that meet the challenges of climate change and the Anthropocene

A Life Of A Physicist In Agricultural Research ANIL VISHNU MOHARIR,2022-07-21 There are not many books of this nature and kind in India on the history of scientific research coming straight from the participating scientist himself In that sense the book A Life of a physicist in agricultural research A Professional autobiography by Professor Anil Vishnu Moharir makes a significant contribution in chronicling the work done by him in the Indian context Efforts put in by Professor Moharir would motivate many young and bright students of physics to foray in the field of biology and agriculture for a satisfying career and opportunities for innovative and original research contribution to their credit Dr Vijay Digambar Garde Ph D Moscow Retd General Manager Bharat Heavy Electricals Ltd Bhopal Madhya Pradesh India The book in fact is a description of the research work done by the author himself in the field of agriculture an area for which he had no formal education and training It is interesting to read how the author not only got his foothold but contributed in a significant way Padmabhushan Prof Dr Ram Badan Singh FNAAS President National Academy of Agricultural Sciences DP Shastri Marg New Delhi India Your book falls in the category of Professional Biography Very few Indians have attempted that Your effort is therefore welcome You have traced your research journey and career course so successfully completed in this well articulated document You have aptly described the institutional workings lost opportunities due to myopic policies and wrong perceptions It is amazing to see that you have moved from the main stream physics and still contributed at the world class level in the allied but new fields Prof Vivek N Patkar Retd Professor and a versatile freelance researcher writer author and promoter of science education Mumbai Maharashtra India Thank you very much for the reprint of your paper Moisture Desorption and Absorption Isotherms for Seeds of Some Cultivars of Triticum aestivum and Triticum durum wheat I thoroughly enjoyed reading it and even re reading it It does not happen often that one can read papers where the author is working at the cross fertilizing the fields of plant science and physical chemistry I do believe that your results will have profound implications in every agricultural discipline not only in breeding and for every crop that humans are cultivating for obtaining their foods Up to now I was more used to seeing and also measuring classical isotherms with water activity on the X axis and moisture content on the Y axis and have the kinetic data separately presented I like your presentation of Normalized mass of seeds over time Your concept of hysteresis area is very talkative very expressive No doubt that it will prove helpful to speed up and to improve plant breeding process Dr Luc De Bry Ph D Head of Research Department M S Dannone Biscuits Herental Belgium

*Climate Change and Biodiversity* Mehtab Singh,R.B.

Singh, M.I. Hassan, 2014-05-09 The over exploitation of important earth resources such as land and water has led to a number of environment related problems the world over At the same time land use change caused by various human activities has led to extinction of many plant and animal habitats and species In this context the relevance of biodiversity for human survival is becoming a major international political issue as scientific evidence builds on the global health implications of biodiversity loss These issues are closely linked with the issue of climate change as many of the health risks due to climate change are associated with rapid degradation of biodiversity This present work focuses on holistic natural resource based spatio temporal planning development and management and considers them as essential to save the degraded ecosystem for sustainable resource management Contributions are compiled in two volumes 1 Climate Change and Biodiversity and 2 Landscape Ecology and Water Management Geoinformatics along with its tools such as remote sensing and geographical information systems GIS have been used in assessing the results of various environmental problems both physical and social The volume will be useful for geographers geoscientists hydrologists landscape ecologists environmentalists engineers planners and policy makers Environmental Concerns and Sustainable Development Sakarama Somayaji, Ganesha Somayaji, 2009-01-01 At the dawn of this 21st century environmental concerns have received utmost attention from all segments of human society The extreme abuse of nature and ruthless hunt for material happiness are the reasons for post enlightenment destruction of the environment Many consider the issues related to environmental degradation as an environmental crisis During the last century humans have been exploiting nature not merely for need but also for greed Environmentally concerned individuals call for immediate action to stop being greedy and act positively In India too this environmental awareness is fast spreading and the Honourable Supreme Court of India has directed the Central and state governments to introduce courses regarding environmental issues at all levels of education This book is a compilation of research results pertaining to development environment and sustainable development in the form of articles **Ecology and Agriculture in the Himalayan Region** Yasir Saeed Hanafi, 2012 **Himalayan Bridge** Niraj Kumar, George van Driem, Phunchok Stobdan, 2020-11-18 The centrality of the Himalayas as a connecting point or perhaps a sacred core for the Asian continent and its civilisations has captivated every explorer and scholar The Himalaya is the meeting point of two geotectonic plates three biogeographical realms two ancient civilisations two different language streams and six religions This book is about the determinant factors which are at work in the Himalayas in the context of what it constitutes in terms of its spatiality legends and myths religious beliefs rituals and traditions The book suggests that there is no single way for understanding the Himalayas There are layers of structures imposition and superimposition of human history religious traits and beliefs that continue to shape the Asian dynamics An understanding of the ultimate union of the Himalayas its confluences and its bridging role is essential for Asian balance This book is a collaborative effort of an internationally acclaimed linguist a diplomat cum geopolitician and a young Asianist It provides countless themes that will be intellectually

stimulating to scholars and students with varied interests Please note This title is co published with KW Publishers New Delhi Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

**Handbook of Green Concept** Ms. Kity Maurya and Dr. Aneeta Sen, This book mainly focuses on Green concept i e Green Chemistry Green Economy Green Finance and various environmental issues This book makes the Green concept crystal clear in different disciplines It is beneficial for individuals of Science Commerce as well as Arts streams Thus it is a web of various fields coming together woven in a better way to understand the Environment and the requirement of understanding its different corners The green concept is not very new concept but still its difficult to understand in regarding to its various fields This Handbook is written in language which could be easily understood which makes the targeted concept clear in a better way Various diagrams tables and examples have been included which makes the book more attractive for the readers **Journal of the United Service Institution of India** United Service Institution of India,2005

**Climate Change, Disaster and Adaptations** Azizur Rahman Siddiqui,Avijit Sahay,2022-02-26 This volume examines how local communities respond and adapt to ecological changes and disasters resulting from climate change The main aim of the book is to understand the range of human responses to ecological change and to contextualise the reasons for adopting any particular adaptive strategy by a community Through the help of specific case studies presented as individual chapters the book aims to find out whether adaptation due to environmental stress is an individual decision and therefore is an isolated phenomenon or if resilience and adaptation are part of the same action paradigm of society as a whole in response to environmental change Of particular interest are the case studies of climate change or disasters that have rendered the site unsuitable for the return of its community at present and thus necessitated the relocation of such communities to new locations The case studies in the book focus on regions in India but cover different parts of the world as well and address concepts of resilience vulnerability risk adaptation and mitigation The book will be useful for students and researchers in the fields of geography disaster management environmental science and anthropology **The Indian National Bibliography**

R. Navalgund,A. Senthil Kumar,Subrata Nandy,2018-10-18 Himalaya one of the global biodiversity hotspots is the abode of a variety of flora and fauna The Himalayan ecosystems have immense ecological socioeconomic and aesthetic significance as they provide a wide range of ecosystem services The northwest Himalaya NWH covering three states of India viz Uttarakhand Himachal Pradesh and Jammu and Kashmir starts from the foothills of Shivaliks in the south and extends to the greater Himalaya in the north This region is also the source of some of the major

rivers of India With the increase in population the NWH ecosystems have been under threat due to deforestation loss of biodiversity expansion of agriculture and settlement overexploitation of natural resources habitat loss and fragmentation poaching mining construction of roads and large dams and unplanned tourism The Himalaya being young and geotectonically active remains inherently unstable fragile and prone to natural disasters Climate change is also likely to impact the Himalayan cryosphere drastically Recognizing the importance of the Himalaya a National Mission for Sustaining the Himalayan Ecosystem one of the eight missions under the National Action Plan on Climate Change NAPCC of Govt of India to conserve biodiversity forest cover and other ecological values in the Himalayan region has been taken up Spaceborne remote sensing with its ability to provide synoptic and repetitive coverage has emerged as a powerful tool for assessment and monitoring of the Himalayan resources and phenomena Indian Institute of Remote Sensing Dehradun has taken up a number of studies in the fields of geology water resources forestry agriculture urban settlement etc over the last decade The book summarises the work carried out in different disciplines illustrated with tables and figures and a host of relevant references It is hoped that the book serves as an excellent reference of immense value to the students researchers professors scientists professionals and decision makers working in the NWH region
