The Origins of Globalization Pim de Zwart,Jan Luiten van Zanden,2018-09-20 For better or for worse in recent times

the rapid growth of international economic exchange has changed our lives But when did this process of globalization begin and what effects did it have on economies and societies Pim de Zwart and Jan Luiten van Zanden argue that the networks of trade established after the voyages of Columbus and Da Gama of the late fifteenth century had transformative effects inaugurating the first era of globalization The global flows of ships people money and commodities between 1500 and 1800 were substantial and the re alignment of production and distribution resulting from these connections had important consequences for demography well being state formation and the long term economic growth prospects of the societies involved in the newly created global economy Whether early globalization had benign or malignant effects differed by region but the world economy as we now know it originated in these changes in the early modern period **The Oxford**

Handbook of Diversity in Organizations Regine Bendl, Inge Bleijenbergh, Elina Henttonen, Albert J. Mills, 2015 Description of the foundations of organizing and managing diversities and multidisciplinary intersectional and critical analyses on key issues Encountering Nature Thomas Heyd, 2016-04-29 This book argues that an attentive encounter with nature is of key importance for the development of an environmentally appropriate culture The fundamental idea is that the environmental degradation that we are increasingly experiencing is best conceived as the consequence of a cultural mismatch our cultures seem not to be appropriate to the natural environment in which we move and on which we depend in thoroughgoing ways In addressing this problem Thomas Heyd weaves together a rich tapestry of perspectives on human interactions with the natural world ranging from traditional modes of managing human communities that include the natural environment to the consideration of poetic travelogues ecological restoration and botanic gardens The volume is divided into three parts which respectively consider the relation of human beings to nature in terms of ethics aesthetics and culture It engages the current literature in each of these areas with the help of inter disciplinary approaches as well as on the basis of personal encounters with natural spaces and processes The ultimate aim of this book is to make a contribution to the development of a cultural fabric that is suitable to the natural spaces and processes in which we may thrive and on which we all depend as individuals and as a species *Iberian Empires and the Roots of Globalization* Ivonne del Valle, Anna More, Rachel Sarah O'Toole, 2020-01-15 Through interdisciplinary essays covering the wide geography of the Spanish and Portuguese empires Iberian Empires and the Roots of Globalization investigates the diverse networks and multiple centers of early modern globalization that emerged in conjunction with Iberian imperialism Iberian Empires and the Roots of Globalization argues that Iberian empires cannot be viewed apart from early modern globalization From research sites throughout the early modern Spanish and Portuguese territories and from distinct disciplinary approaches the essays collected in this volume investigate the economic mechanisms administrative hierarchies and art forms that linked the early modern Americas Africa Asia and Europe Iberian Empires and the Roots of Globalization demonstrates that early globalization was structured through diverse networks and their mutual and conflictive interactions within overarching imperial projects To this end the essays

explore how specific products, texts, and people bridged ideas and institutions to produce multiple centers within Iberian imperial geographies. Taken as a whole, the authors also argue that despite attempts to reproduce European models, early Iberian globalization depended on indigenous agency and the agency of people of African descent, which often undermined or changed these models. The volume thus relays a nuanced theory of early modern globalization; the essays outline the Iberian imperial models that provided templates for future global designs and simultaneously detail the negotiated and conflictive forms of local interactions that characterized that early globalization. The essays here offer essential insights into historical continuities in regions colonized by Spanish and Portuguese monarchies.
