Community Development Block Grant Program Annual Report United States. Department of Housing and Urban Development, **Green Gentrification and Environmental Injustice** Heather E. Campbell, Adam Eckerd, Yushim Kim, 2024-09-13 This book argues that given the complex nature of the urban environment we cannot find one optimal solution to reducing environmental injustice in part because there is no singular cause Environmental injustice emerges in particular settings because of the combined and interdependent effects of a variety of different policy and community characteristics The authors argue that addressing these interlinked problems requires an understanding of the clusters of

community and contextual factors that combine in a variety of ways to both create problems and imply policy approaches to managing them. They argue for the use of complexity informed methods to assist in making public policy choices such as Qualitative Comparative Analysis (QCA) and Agent based Modeling (ABM) to enable us to better identify plausible solutions for specific contexts. This volume offers a new perspective for strategically managing urban policy that considers the risk of gentrification and gentrification related displacement with the ultimate goal of improving social justice. Environmental injustice, pollution, remediation, gentrification and displacement are interlinked problems all of which impinge on social justice in US cities. However, public policy research and often practice as well has tended to separately consider urban policy issues such as environmental injustice, brownfields and other pollution remediation, how to redevelop neighborhoods and how to contend with gentrification and displacement. In this book, the authors take a new perspective to such intertwined urban policy issues using complexity thinking and more importantly complex adaptive systems approaches in order to develop context sensitive policy approaches to managing these ongoing problems.

[The Roles of International Law in Development](#) Siobhan McInerney-Lankford,Robert McCorquodale,2023-10-21 The Roles of International Law in Development provides an in depth analysis of the relationship between public international law and development Unlike the existing body of literature on public international law this book investigates how international law and development interact and evaluates the significant and multifaceted roles that international law plays in development Bringing together a collection of perspectives from contributors working across multiple fields the chapters explore the relevance and applicability of international law to particular sectors and issues implicated in development activities This includes chapters on human rights gender equality race and discrimination environmental law and climate change forced displacement and migration and international trade and investment They analyse how international law rules and processes can influence procedural and substantive aspects of development policies as these regulate various forms of financial support trade technical assistance and policy dialogue They

also explore whether and how development could be more effective and yield more equitable and sustainable outcomes if the relevant and applicable rules of international law were better understood consistently incorporated and appropriately applied to development activities A foundational premise of this book is that development policy and practice should be grounded more systematically in international law rejecting the notion that development law and policy comprise a self contained regime or that development is undertaken in a legal vacuum The proposed systematic grounding in public international law would in turn help uphold international legal accountability in the context of development activities **Report** Great Britain.
