Competition Law and Development D. Daniel Sokol, Thomas K. Cheng, Ioannis Lianos, 2013-09-11 The vast majority of the countries in the world are developing countries there are only thirty four OECD Organisation for Economic Co operation and Development countries and yet there is a serious dearth of attention to developing countries in the international and comparative law scholarship which has been preoccupied with the United States and the European Union Competition Law and Development investigates whether or not the competition law and policy transplanted from Europe and the United States can be successfully implemented in the developing world or whether the developing world experience suggests a need for a different analytical framework The political and economic environment of developing countries often differs significantly from that of developed countries in ways that may have serious implications for competition law enforcement The need to devote greater attention to developing countries is also justified by the changing global economic reality in which developing countries especially China India and Brazil have emerged as economic powerhouses Together with Russia the so called BRIC countries have accounted for thirty percent of global economic growth since the term was coined in 2001 In this sense developing countries deserve more attention not because of any justifiable differences from developed countries in competition law enforcement either in theoretical or practical terms but because of their sheer economic heft This book the second in the Global Competition Law and Economics series provides a number of viewpoints of what competition law and policy mean both in theory and practice in a development context *World Economic Growth and Competition* United States. Congress. Joint Economic Committee. Subcommittee on Foreign Economic Policy, 1956 Examines economic growth in

developing countries in the context of resistance to the expansion of Communist bloc influence *World Economic Growth and Competition* United States. Congress. Joint Economic Committee,1957 Examines economic growth in developing countries in the context of resistance to the expansion of Communist bloc influence **Competition Law in Latin America** Julián Peña,Marcelo Calliari,2016-02-18 In the past few years Latin American countries have taken giant steps to reposition their competition authorities in the global antitrust arena granting them much greater autonomy both domestically and internationally This is the first book to offer an in depth analysis of this complex scenario At the heart of the presentation are seven chapters detailing the competition regimes of the most active national jurisdictions in the region Argentina Brazil Chile Colombia Mexico Peru and Uruguay Written by practicing experts with considerable hands on experience in their respective countries each of these chapters provides a comprehensive description and explanation of the evolution current state and prospects for antitrust in the country Preceding these country by country analyses are more general chapters on the use of economic analysis and on the special field of the information and communications technology industry as well as chapters on the working of competition law in countries with regulated markets and in the cluster of Central American countries Topics addressed encompass the following and more relevant institutions and legislation cartel investigations unilateral conduct policies merger review international coordination enforcement and remedies Each chapter includes analysis of relevant case law allowing the reader to gauge the positions views and tendencies of each competition law regime The authors also pay attention to the specificities and idiosyncrasies that are so important for a correct understanding of the practical realities of competition policy and enforcement With its wide ranging and in depth approach this book provides an incomparable analysis of a challenging region poised to become increasingly important in the international recognition and enforcement of antitrust law It is in this sense an essential guide for lawyers economists corporations academics and government officials interested in understanding where competition law is and where it is going to in Latin America **The Domestication of Competition** Jonathan Hearn,2023-02-16 Show how the pervasive influence of competition reorganised military economic political and cultural power thereby forming modern liberal society **Comparative Political Systems** Charles F. Andrain,1994 This book focuses on the economic changes produced by different political systems and on the social impact of regime transformations It addresses several key policy issues How does the policy process operate in various types of political systems What impact do public policies and policy outcomes wield on transformations in a political system How does public policy preference in different political systems affect democracy capitalism and socialism *Global Competition* David Gerber,2012-01-26 A key factor in the emerging relationship between law and economic globalization is how global competition now shapes economies and societies Competition law is provided by those players that have sufficient power to apply their laws transnationally This book examines this important and controversial aspect of globalization **World Economic Growth and Competition** United States. Congress Economic Joint Committee,1957 **Economic**

The Crisis of Distribution and the Regulation of Economic Law Shouwen Zhang, 2022-05-29 The crisis of distribution is one of the longest standing and complicated issues facing human society Imbued with social political historic and cultural elements it varies significantly across different countries as a result of all these factors As an emerging economy which transferred from a planned to a market economy China has experienced large distribution gaps since it implemented the Reform and Opening up Policy in the early 1980s requiring stronger economic law to mitigate and regulate the crisis of distribution The two volumes examine the crisis of distribution that China faces and proposes policy and economic law methods that can be used to overcome the distribution dilemma The author discusses the four main concepts and focus points of the crisis of distribution distribution itself the crises it faces the rule of law and development before proposing a theoretical framework of system distribution development to resolve distribution problems that China faces The set should be of keen interest to researchers and students of law economics and political science

E. Rodriguez, Ashok Menon, 2010-01-01 What the authors offer is a thoroughgoing analysis clearly demonstrating that whatever economic path developing countries pursue imposing Western style antitrust regimes will engender uncertainty chill economic behaviour and foster an unhealthy climate for business They employ the influential error cost methodology to appraise the performance of competition policy and to show how such a policy creates irresolvable tensions in fragile economies with weak institutions economies characterized by informal rules of business practice long standing symbiotic business state relationships and unpredictable state action They mount a powerful critique of the arguments of neo institutionalists who fail to recognize the vulnerable nature of emerging market economies and competition advocates who presume to stand ready and vigilant to enforce competition policy on state entities
