## **Economic Issues In China:**

**China And The Global Economic Crisis** Yongnian Zheng, Sarah Yueting Tong, 2010-02-22 The current global financial turmoil triggered by the US subprime crisis has spread quickly and resulted in the worst global economic crisis since the 1930s As the world's third largest economy and the second largest trading nation China is inevitably affected seriously How China responds to the crisis and how effective its measures are in sustaining a healthy growth will have important implications both domestically and internationally The chapters in this volume are divided into five sections Section one examines the overall impact of the global economic crisis and the responses of the Chinese government Section two studies the regional aspect of the economy affected by the crisis Section three explores such economies of the Mainland's southern neighbors as Hong Kong Macao and Taiwan and the prospect of China's trade Section four surveys the impact on the ideological and social aspects of the country Section five concludes with an assessment of China's external policies The volume offers a comprehensive and in depth assessment of the impact of the crisis and the measures of the Chinese government to overcome the difficulties

**China's Currency: An Analysis of the Economic Issues** Wayne M. Morrison, 2008 This report summarizes China's economic issues and its currency manipulation intended to make its exports cheaper and imports into China more expensive than they would be under free market conditions

**China's Currency and Economic Issues** Wayne M. Morrison, Marc Labonte, Jonathan E. Sanford, 2006 China has a policy of pegging its currency the yuan to the U S dollar If the yuan is undervalued against the dollar there are likely to be both benefits and costs to the U S economy It would mean that imported Chinese goods are cheaper than they would be if the yuan were market determined This lowers prices for U S consumers and diminishes inflationary pressures It also lowers prices for U S firms that use imported inputs such as parts in their production making such firms more competitive Critics of China's peg point to the large and growing U S trade deficit with China as evidence that the yuan is undervalued and harmful to the U S economy The relationship is more complex for a number of reasons First while China runs a large trade surplus with the United States it runs a significant trade deficit with the rest of the world Second an increasing level of Chinese exports are from foreign invested companies in China that have shifted production there to take advantage of China's abundant low cost labour Third

the deficit masks the fact that China has become one of the fastest growing markets for U S exports total U S bilateral trade deficits in 2004 indicating that the overall trade deficit is not caused by the exchange rate policy of one country but rather the shortfall between U S saving and investment This book presents a coherent examination of the details behind China s currency policies as they relate to outside factors Contemporary Economic Issues in China John Zerby,1989 *China's Economy Into the New Century* John Wong,2002 In the last two decades of the 20th century China stood out as the world s star performer in economic growth thanks to the market oriented reform that started in 1978 At the turn of the century the Chinese economy faces a series of challenges to sustain its growth and stability The two decade long rapid growth has effectively strengthened China s economic power and raised its people s standard of living It has also transformed China from a centrally planned command economy into a OC socialist market economyOCO which operates increasingly in line with capitalist norms Major structural problems however remain and are growing acute Weakness in the fiscal system breeds rent seeking at the local level and causes tension in the state budget The flawed financial institutions and the biased ownership structure continue to distort resource allocation and cause huge efficiency losses Inter provincial and inter regional disparity is reaching a level that threatens national unity and social stability As China joins the World Trade Organization and becomes more integrated into the world economy it urgently needs to improve the domestic business environment and to beef up indigenous industries for foreign competition This volume is a collection of papers written by scholars at the East Asian Institute to address those problems during the period 1999OCO2001 The authors with their knowledge and experience in China studies provide in depth observations and professional analyses of some of the most important issues for the Chinese economy at the turn of the century Some of the observations and analyses lead to enlightening policy recommendations The solid scholarship combined with the policy orientation of these papers will appeal greatly to researchers in academia governments and other institutions The policy oriented and fact based analyses will also be of interest to practitioners in business including business consultants **China's Economic Reforms: Successes And Challenges** Peter Koveos,Yimin Zhang,2023-01-19 In the last 40 years of China s economic reforms the country has made unprecedented progress in its economic development and its position in the global stage As a result interest in China has resulted in numerous books focusing on the world s second largest economy A single volume however cannot possibly explain the complex nature of China s economic system and its relationship with the rest of the world China s Economic Reforms Successes and Challenges contributes to the understanding of China s reforms by offering a detailed analysis of critical components of the country s economic architecture Within the context of the global economy the book illustrates the performance of the Chinese economy at both the aggregate and individual sector levels before and after reforms Comparisons and contrasts are made with the economies of the US Japan South Korea India and Russia The book presents the challenges facing the Chinese reform process and explain how these challenges affect the domestic economy the rest of the world and the overall success of China
